Civil Engineering Database Subject Heading Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1970. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2006 from a CEDB subject heading list. The CEDB and subject heading list can be accessed on the Web at *http://www.pubs.asce.org/cedbsrch.html*.

Abatement and removal
Evaluating Bioretention Hydrology and Nutrient Removal at Three Field Sites in North Carolina — W. F. Hunt, A. R. Jarrett, J. T. Smith, and L. J. Sharkey; 132 (6), 600-8 (2006).

Agricultural wastes
Economic Analysis of an Irrigation System for Liquid Manure Application — Tihomir Ancev and Arthur L. Stoecker; 132 (4), 399-405 (2006).

Agriculture
Performance-Based Optimization of Land and Water Resources within Irrigation Schemes. I: Method — Sunil D. Gorantiwar, Ian K. Smout, and K. Vairavamoorthy; 132 (4), 332-40 (2006).

Performance-Based Optimization of Land and Water Resources within Irrigation Schemes. II: Application — Ian K. Smout, Sunil D. Gorantiwar, and K. Vairavamoorthy; 132 (4), 341-8 (2006).

Algorithms
Optimal Reservoir Operation for Irrigation of Multiple Crops Using Genetic Algorithms — D. Nagesh Kumar, K. Srinivasa Raju, and B. Ashok; 132 (2), 123-9 (2006).

Optimal Reservoir Operations for Irrigation Using a Three Spatial Scales Approach — Francesco Mannocchi and Francesca Todisco; 132 (2), 130-42 (2006).

Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Theory — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 198-207 (2006).

Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Simulation Results — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 208-19 (2006).

Parameter Estimation for the Nonlinear Muskingum Model Using the BFGS Technique — Zong Woo Geem; 132 (5), 474-8 (2006).

Allocations
Optimal Irrigation Planning under Water Scarcity — A. Srinivasa Prasad, N. V. Umamahesh, and G. K. Viswanath; 132 (3), 228-37 (2006).

Alluvial valleys
Evaluating Regional Solutions to Salinization and Waterlogging in an Irrigated River Valley — J. Philip Burkhalter and Timothy K. Gates; 132 (1), 21-30 (2006).

Analytical techniques
Efficient Solution of the Coupled One-Dimensional Surface—Two-Dimensional Subsurface Flow during Furrow Irrigation Advance — Th. Wöhling, A. Fröhner, G. H. Schmitz, and R. Liedl; 132 (4), 380-8 (2006).

Seepage to a Drainage Ditch and Optimization of Its Shape — A. R. Kacimov; 132 (6), 619-22 (2006).

Animals
Economic Analysis of an Irrigation System for Liquid Manure Application — Tihomir Ancev and Arthur L. Stoecker; 132 (4), 399-405 (2006).

Aquifers
Simplified Kernel Method for Flow to Large Diameter Wells — Sushil K. Singh; 132 (1), 77-9 (2006).

Flow Depletion of Semipervious Streams Due to Unsteady Pumping Discharge — Sushil K. Singh; 132 (4), 406-9 (2006).

Arizona
Salt River Project Canal Automation Pilot Project: Simulation Tests — E. Bautista, A. J. Clemmens, and R. J. Strand; 132 (2), 143-52 (2006).

Automation
Salt River Project Canal Automation Pilot Project: Simulation Tests — E. Bautista, A. J. Clemmens, and R. J. Strand; 132 (2), 143-52 (2006).

Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Theory — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 198-207 (2006).

Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Simulation Results — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 208-19 (2006).

Bed load
Performances of Hydraulics and Bedload Sediment Flushing in Rigid Channel Using Surge Flows — Guoliang Yu and Soon-Keat Tan; 132 (2), 171-9 (2006).

Bed roughness
Energy Dissipation on Reinforced Block Ramps — Stefano Pagliara and Pietro Chiavaccini; 132 (3), 293-7 (2006).

Beds
Errors in the Bed Shear Stress as Estimated from Vertical Velocity Profile — Guoliang Yu and Soon-Keat Tan; 132 (5), 490-7 (2006).

Best management practice
Evaluating Bioretention Hydrology and Nutrient Removal at Three Field Sites in North Carolina — W. F. Hunt, A. R. Jarrett, J. T. Smith, and L. J. Sharkey; 132 (6), 600-8 (2006).

Boulders
Energy Dissipation on Reinforced Block Ramps — Stefano Pagliara and Pietro Chiavaccini; 132 (3), 293-7 (2006).

Boundaries
Modified Kostiakov Infiltration Function: Accounting for Initial and Boundary Conditions — A. Furman, A. W. Warrick, D. Zerihun, and C. A. Sanchez; 132 (6), 587-96 (2006).

Bureau of Reclamation
Hydrologic Modeling Inventory: Cooperative Research Effort — Vijay P. Singh, Donald K. Frevert, Jeffrey D. Rieker, Verne Leverson, Susan Meyer, and Steffen Meyer; 132 (2), 98-103 (2006).

Calibration
Parameter Estimation for the Nonlinear Muskingum Model Using the BFGS Technique — Zong Woo Geem; 132 (5), 474-8 (2006).

California
Measurement of Light Interception by Navel Orange Orchard Canopies: Case Study of Lindsay, California — Simona Consoli, Neil O'Connell, and Richard Snyder; 132 (1), 9-20 (2006).

Canals
Salt River Project Canal Automation Pilot Project: Simulation Tests — E. Bautista, A. J. Clemmens, and R. J. Strand; 132 (2), 143-52 (2006).

Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Theory — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 198-207 (2006).

Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Simulation Results — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 208-19 (2006).

Tuning of Robust Distant Downstream PI Controllers for an Irrigation Canal Pool. I: Theory — X. Litrico and V. Fromion; 132 (4), 359-68 (2006).

Tuning of Robust Distant Downstream PI Controllers for an Irrigation Canal Pool. II: Implementation Issues — X. Litrico, V. Fromion, and J.-P. Baume; 132 (4), 369-79 (2006).

Case reports
Managing Irrigation for Better River Ecosystems—A Case Study of the Middle Rio Grande — Ramchand Oad and Rachel Kullman; 132 (6), 579-86 (2006).

Considerations for Storm-Water Outfalls off Exposed Coasts — Robert A. Grace; 132 (6), 609-18 (2006).

Cavitation
Investigation of the Influence of Sprinkler Fins and Dissolved Air on Jet Flow — M. Pascal, N. Kadem, and A. Tchiftchibachian; 132 (1), 41-6 (2006).

Channel flow
Fuzzy Analysis of Slope-Area Discharge Estimates

Beds
Errors in the Bed Shear Stress as Estimated from Vertical Velocity Profile — Guoliang Yu and Soon-Keat Tan; 132 (5), 490-7 (2006).

Best management practice
Evaluating Bioretention Hydrology and Nutrient Removal at Three Field Sites in North Carolina — W. F. Hunt, A. R. Jarrett, J. T. Smith, and L. J. Sharkey; 132 (6), 600-8 (2006).

Boulders
Energy Dissipation on Reinforced Block Ramps — Stefano Pagliara and Pietro Chiavaccini; 132 (3), 293-7 (2006).

Boundaries
Modified Kostiakov Infiltration Function: Accounting for Initial and Boundary Conditions — A. Furman, A. W. Warrick, D. Zerihun, and C. A. Sanchez; 132 (6), 587-96 (2006).

Bureau of Reclamation
Hydrologic Modeling Inventory: Cooperative Research Effort — Vijay P. Singh, Donald K. Frevert, Jeffrey D. Rieker, Verne Leverson, Susan Meyer, and Steffen Meyer; 132 (2), 98-103 (2006).

Calibration
Parameter Estimation for the Nonlinear Muskingum Model Using the BFGS Technique — Zong Woo Geem; 132 (5), 474-8 (2006).

California
Measurement of Light Interception by Navel Orange Orchard Canopies: Case Study of Lindsay, California — Simona Consoli, Neil O'Connell, and Richard Snyder; 132 (1), 9-20 (2006).

Canals
Salt River Project Canal Automation Pilot Project: Simulation Tests — E. Bautista, A. J. Clemmens, and R. J. Strand; 132 (2), 143-52 (2006).

Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Theory — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 198-207 (2006).

Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Simulation Results — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 208-19 (2006).

Tuning of Robust Distant Downstream PI Controllers for an Irrigation Canal Pool. I: Theory — X. Litrico and V. Fromion; 132 (4), 359-68 (2006).

Tuning of Robust Distant Downstream PI Controllers for an Irrigation Canal Pool. II: Implementation Issues — X. Litrico, V. Fromion, and J.-P. Baume; 132 (4), 369-79 (2006).

Case reports
Managing Irrigation for Better River Ecosystems—A Case Study of the Middle Rio Grande — Ramchand Oad and Rachel Kullman; 132 (6), 579-86 (2006).

Considerations for Storm-Water Outfalls off Exposed Coasts — Robert A. Grace; 132 (6), 609-18 (2006).

Cavitation
Investigation of the Influence of Sprinkler Fins and Dissolved Air on Jet Flow — M. Pascal, N. Kadem, and A. Tchiftchibachian; 132 (1), 41-6 (2006).

Channel flow
Fuzzy Analysis of Slope-Area Discharge Estimates

— Richard H. McCuen and Zachary Knight; 132 (1), 64-9 (2006).

Channels

Capillarity and Evaporation Exacerbated Seepage Losses from Unlined Channels — A. R. Kacimov; 132 (6), 623-6 (2006).

Climatic changes

Sensitivity Analyses and Sensitivity Coefficients of Standardized Daily ASCE-Penman-Monteith Equation — Suat Irmak, José O. Payero, Derrel L. Martin, Ayse Irmak, and Terry A. Howell; 132 (6), 564-78 (2006).

Coastal environment

Considerations for Storm-Water Outfalls off Exposed Coasts — Robert A. Grace; 132 (6), 609-18 (2006).

Coefficients

Estimation of Evapotranspiration of Different-Sized Navel-Orange Tree Orchards Using Energy Balance — Simona Consoli, Neil O'Connell, and Richard Snyder; 132 (1), 2-8 (2006).

Broad-Crested Weirs with Rectangular Compound Cross Sections — M. Göğüş, Z. Defne, and V. Özkandemir; 132 (3), 272-80 (2006).

Effectiveness of Bermuda Grass as Vegetative Cover in Grassed Waterway: A Simulated Study — P. K. Mishra, J. K. Neelkanth, B. Maheswara Babu, and S. S. Kumathe; 132 (3), 288-92 (2006).

Minimum Specific Energy and Critical Flow Conditions in Open Channels — H. Chanson; 132 (5), 498-502 (2006).

Sensitivity Analyses and Sensitivity Coefficients of Standardized Daily ASCE-Penman-Monteith Equation — Suat Irmak, José O. Payero, Derrel L. Martin, Ayse Irmak, and Terry A. Howell; 132 (6), 564-78 (2006).

Colorado

Evaluating Regional Solutions to Salinization and Waterlogging in an Irrigated River Valley — J. Philip Burkhalter and Timothy K. Gates; 132 (1), 21-30 (2006).

Colorado River

Modeling Uncertainty in an Object-Oriented Reservoir Operations Model — John C. Carron, Edith A. Zagona, and Terrance J. Fulp; 132 (2), 104-11 (2006).

Computational fluid dynamics technique

Real Local Losses Estimation for On-Line Emitters Using Empirical and Numerical Procedures — Guillermo Palau-Salvador, Luis H. Sanchis, Pablo González-Altozano, and Jaime Arviza-Valverde; 132 (6), 522-30 (2006).

Computer models

Hydrologic Modeling Inventory: Cooperative Research Effort — Vijay P. Singh, Donald K. Frevert, Jeffrey D. Rieker, Verne Leverson, Susan Meyer, and Steffen Meyer; 132 (2), 98-103 (2006).

Computer programming

Optimal Reservoir Operations for Irrigation Using a Three Spatial Scales Approach — Francesco Mannocchi and Francesca Todisco; 132 (2), 130-42 (2006).

Irrigation Scheduling with Travel Times — Tonny T. de Vries and Arif A. Anwar; 132 (3), 220-7 (2006).

Optimal Irrigation Planning under Water Scarcity — A. Srinivasa Prasad, N. V. Umamahesh, and G. K. Viswanath; 132 (3), 228-37 (2006).

Computer software

Stochastic Streamflow Simulation Using *SAMS-2003* — J. D. Salas, O. G. Sveinsson, W. L. Lane, and D. K. Frevert; 132 (2), 112-22 (2006).

Control systems

Tuning of Robust Distant Downstream PI Controllers for an Irrigation Canal Pool. I: Theory — X. Litrico and V. Fromion; 132 (4), 359-68 (2006).

Tuning of Robust Distant Downstream PI Controllers for an Irrigation Canal Pool. II: Implementation Issues — X. Litrico, V. Fromion, and J.-P. Baume; 132 (4), 369-79 (2006).

Cost control

Set Sprinkler Irrigation and Its Cost — José Nicolás Ortiz Romero, Jesús Montero Martínez, Roberto Simón Martínez, and José María Tarjuelo Martín-Benito; 132 (5), 445-52 (2006).

Coupling

Efficient Solution of the Coupled One-Dimensional Surface—Two-Dimensional Subsurface Flow during Furrow Irrigation Advance — Th. Wöhling, A. Fröhner, G. H. Schmitz, and R. Liedl; 132 (4), 380-8 (2006).

Critical flow

Minimum Specific Energy and Critical Flow Conditions in Open Channels — H. Chanson; 132 (5), 498-502 (2006).

Optimal Design of Open Channel Section Incorporating Critical Flow Condition — Rajib Kumar Bhattacharjya; 132 (5), 513-8 (2006).

Crops

Estimation of Evapotranspiration of Different-Sized Navel-Orange Tree Orchards Using Energy Balance — Simona Consoli, Neil O'Connell, and Richard Snyder; 132 (1), 2-8 (2006).

Measurement of Light Interception by Navel Orange Orchard Canopies: Case Study of Lindsay, California — Simona Consoli, Neil O'Connell, and Richard Snyder; 132 (1), 9-20 (2006).

Optimal Reservoir Operation for Irrigation of Multiple Crops Using Genetic Algorithms — D. Nagesh Kumar, K. Srinivasa Raju, and B. Ashok; 132 (2), 123-9 (2006).

Optimal Reservoir Operations for Irrigation Using a Three Spatial Scales Approach — Francesco Mannocchi and Francesca Todisco; 132 (2), 130-42 (2006).

Performance-Based Optimization of Land and Water Resources within Irrigation Schemes. I: Method — Sunil D. Gorantiwar, Ian K. Smout, and K. Vairavamoorthy; 132 (4), 332-40 (2006).

Performance-Based Optimization of Land and Water Resources within Irrigation Schemes. II: Application — Ian K. Smout, Sunil D. Gorantiwar, and K. Vairavamoorthy; 132 (4), 341-8 (2006).

Development of GIS-Based Model to Estimate Relative Reductions in Crop Yield due to Salinity and Waterlogging — Luis A. Garcia, Nathan Foged, and Grant E. Cardon; 132 (6), 553-63 (2006).

Cross sections

Broad-Crested Weirs with Rectangular Compound Cross Sections — M. Göğüş, Z. Defne, and V. Özkandemir; 132 (3), 272-80 (2006).

Data analysis

Optimal Instantaneous Unit Hydrograph from Multistorm Data — Sushil K. Singh; 132 (3), 298-302 (2006).

Data collection

Stochastic Streamflow Simulation Using *SAMS-2003* — J. D. Salas, O. G. Sveinsson, W. L. Lane, and D. K. Frevert; 132 (2), 112-22 (2006).

Decision support systems

Watershed and River Systems Management Program: Overview of Capabilities — Donald Frevert, Terrance Fulp, Edith Zagona, George Leavesley, and Harry Lins; 132 (2), 92-7 (2006).

Model for the Simulation of Water Flows in Irrigation Districts. I: Description — S. Lecina and E. Playán; 132 (4), 310-21 (2006).

Model for the Simulation of Water Flows in Irrigation Districts. II: Application — S. Lecina and E. Playán; 132 (4), 322-31 (2006).

Managing Irrigation for Better River Ecosystems—A Case Study of the Middle Rio Grande — Ramchand Oad and Rachel Kullman; 132 (6), 579-86 (2006).

Developing countries

Simplified Kernel Method for Flow to Large Diameter Wells — Sushil K. Singh; 132 (1), 77-9 (2006).

Dimensional analysis

Dimensionless Stage–Discharge Relationship in Radial Gates — M. A. Shahrokhnia and M. Javan; 132 (2), 180-4 (2006).

Discharge measurement

Broad-Crested Weirs with Rectangular Compound Cross Sections — M. Göğüş, Z. Defne, and V. Özkandemir; 132 (3), 272-80 (2006).

Dimensionless Stage–Discharge Relationship in Radial Gates — M. A. Shahrokhnia and M. Javan; 132 (2), 180-4 (2006).

Ditches

Seepage from a Rectangular Ditch to the Groundwater Table — Serdar Korkmaz and Halil Önder; 132 (3), 263-71 (2006).

Drainage

Combination Subsurface Irrigation and Drainage Systems in North-Central South Dakota — Darrell W. DeBoer and Dwayne L. Beck; 132 (1), 47-54 (2006).

Effect of Controlled Drainage and Vegetative Buffers on Drainage Water Quality from Wastewater Irrigated Fields — Z. Jia, R. O. Evans, and J. T. Smith; 132 (2), 159-70 (2006).

Considerations for the Design of Intercepting Drainage for Collecting Water from Seep Areas — Daniel Bucur and Paul Savu; 132 (6), 597-9 (2006).

Seepage to a Drainage Ditch and Optimization of Its Shape — A. R. Kacimov; 132 (6), 619-22 (2006).

Drawdown

Simplified Kernel Method for Flow to Large Diameter Wells — Sushil K. Singh; 132 (1), 77-9 (2006).

Ecology
Managing Irrigation for Better River Ecosystems—A Case Study of the Middle Rio Grande — Ramchand Oad and Rachel Kullman; 132 (6), 579-86 (2006).

Economic factors
Combination Subsurface Irrigation and Drainage Systems in North-Central South Dakota — Darrell W. DeBoer and Dwayne L. Beck; 132 (1), 47-54 (2006).

Economic models
Economic Analysis of an Irrigation System for Liquid Manure Application — Tihomir Ancev and Arthur L. Stoecker; 132 (4), 399-405 (2006).

Ecuador
Irrigation Potential of the TRASVASE System (Santa Elena Peninsula, Guayas, Ecuador) — Camilo Cornejo, Dorota Z. Haman, Ramon L. Espinel, and Jonathan Jordan; 132 (5), 453-62 (2006).

Effluents
Economic Analysis of an Irrigation System for Liquid Manure Application — Tihomir Ancev and Arthur L. Stoecker; 132 (4), 399-405 (2006).

Electrical conductivity
Calibration of Electromagnetic Induction for Regional Assessment of Soil Water Salinity in an Irrigated Valley — James M. Wittler, Grant E. Cardon, Timothy K. Gates, Curtis A. Cooper, and P. Lorenz Sutherland; 132 (5), 436-44 (2006).

Empirical equations
Nonlinear PLS Method for Side Weir Flows — A. S. Ramamurthy, Junying Qu, and Diep Vo; 132 (5), 486-9 (2006).

Endangered species
Modeling Uncertainty in an Object-Oriented Reservoir Operations Model — John C. Carron, Edith A. Zagona, and Terrance J. Fulp; 132 (2), 104-11 (2006).

Energy
Minimum Specific Energy and Critical Flow Conditions in Open Channels — H. Chanson; 132 (5), 498-502 (2006).

Energy dissipation
Flow Patterns and Energy Dissipation over Various Stepped Chutes — Chaiyuth Chinnarasri and Somchai Wongwises; 132 (1), 70-6 (2006).

Energy Dissipation on Reinforced Block Ramps — Stefano Pagliara and Pietro Chiavaccini; 132 (3), 293-7 (2006).

Environmental impacts
Evaluating Regional Solutions to Salinization and Waterlogging in an Irrigated River Valley — J. Philip Burkhalter and Timothy K. Gates; 132 (1), 21-30 (2006).

Errors
Errors in the Bed Shear Stress as Estimated from Vertical Velocity Profile — Guoliang Yu and Soon-Keat Tan; 132 (5), 490-7 (2006).

Estimation
Optimal Instantaneous Unit Hydrograph from Multistorm Data — Sushil K. Singh; 132 (3), 298-302 (2006).

Evaluation
Performance Evaluation of Reference Evapotranspiration Equations across a Range of Indian Climates — Lakshman Nandagiri and Gicy M. Kovoor; 132 (3), 238-49 (2006).

Evaporation
Estimating Evaporation from Bare Soil Using Soil Moisture Data — Francesca Ventura, Richard L. Snyder, and Khaled M. Bali; 132 (2), 153-8 (2006).

Estimating Evaporation Using ANFIS — Özlem Terzi, M. Erol Keskin, and E. Dilek Taylan; 132 (5), 503-7 (2006).

Seepage to a Drainage Ditch and Optimization of Its Shape — A. R. Kacimov; 132 (6), 619-22 (2006).

Capillarity and Evaporation Exacerbated Seepage Losses from Unlined Channels — A. R. Kacimov; 132 (6), 623-6 (2006).

Evapotranspiration
Estimation of Evapotranspiration of Different-Sized Navel-Orange Tree Orchards Using Energy Balance — Simona Consoli, Neil O'Connell, and Richard Snyder; 132 (1), 2-8 (2006).

Measurement of Light Interception by Navel Orange Orchard Canopies: Case Study of Lindsay, California — Simona Consoli, Neil O'Connell, and Richard Snyder; 132 (1), 9-20 (2006).

Performance Evaluation of Reference Evapotranspiration Equations across a Range of Indian Climates — Lakshman Nandagiri and Gicy M. Kovoor; 132 (3), 238-49 (2006).

Irrigation Potential of the TRASVASE System (Santa Elena Peninsula, Guayas, Ecuador) — Camilo Cornejo, Dorota Z. Haman, Ramon L. Espinel, and Jonathan Jordan; 132 (5), 453-62 (2006).

Sensitivity Analyses and Sensitivity Coefficients of Standardized Daily ASCE-Penman-Monteith Equation — Suat Irmak, José O. Payero, Derrel L. Martin, Ayse Irmak, and Terry A. Howell; 132 (6), 564-78 (2006).

Experimental data
VOF Model for Simulation of a Free Overfall in Trapezoidal Channels — A. S. Ramamurthy, Junying Qu, and Diep Vo; 132 (4), 425-8 (2006).

Feedback control
Salt River Project Canal Automation Pilot Project: Simulation Tests — E. Bautista, A. J. Clemmens, and R. J. Strand; 132 (2), 143-52 (2006).

Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Theory — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 198-207 (2006).

Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Simulation Results — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 208-19 (2006).

Fertilizers
Impact of Agriculture on Water Quality in the North Carolina Middle Coastal Plain — Michael D. Dukes and Robert O. Evans; 132 (3), 250-62 (2006).

Finite difference method
Seepage from a Rectangular Ditch to the Groundwater Table — Serdar Korkmaz and Halil Önder; 132 (3), 263-71 (2006).

Flood routing
Parameter Estimation for the Nonlinear Muskingum Model Using the BFGS Technique — Zong Woo Geem; 132 (5), 474-8 (2006).

Floods
Fuzzy Analysis of Slope-Area Discharge Estimates — Richard H. McCuen and Zachary Knight; 132 (1), 64-9 (2006).

Flow characteristics
Dimensionless Stage–Discharge Relationship in Radial Gates — M. A. Shahrokhnia and M. Javan; 132 (2), 180-4 (2006).

Flow control
Salt River Project Canal Automation Pilot Project: Simulation Tests — E. Bautista, A. J. Clemmens, and R. J. Strand; 132 (2), 143-52 (2006).

Flow patterns
Flow Patterns and Energy Dissipation over Various Stepped Chutes — Chaiyuth Chinnarasri and Somchai Wongwises; 132 (1), 70-6 (2006).

Flow simulation
Real Local Losses Estimation for On-Line Emitters Using Empirical and Numerical Procedures — Guillermo Palau-Salvador, Luis H. Sanchis, Pablo González-Altozano, and Jaime Arviza-Valverde; 132 (6), 522-30 (2006).

Flumes
Effectiveness of Bermuda Grass as Vegetative Cover in Grassed Waterway: A Simulated Study — P. K. Mishra, J. K. Neelkanth, B. Maheswara Babu, and S. S. Kumathe; 132 (3), 288-92 (2006).

Flushing
Performances of Hydraulics and Bedload Sediment Flushing in Rigid Channel Using Surge Flows — Guoliang Yu and Soon-Keat Tan; 132 (2), 171-9 (2006).

Free flow
Dimensionless Stage–Discharge Relationship in Radial Gates — M. A. Shahrokhnia and M. Javan; 132 (2), 180-4 (2006).

Free surfaces
Seepage from a Rectangular Ditch to the Groundwater Table — Serdar Korkmaz and Halil Önder; 132 (3), 263-71 (2006).

Friction
Total Friction Loss along Multiple Outlets Pipes with Open End — Reynaldo R. Chinea and Antonio Dominguez; 132 (1), 31-40 (2006).

Froude number
Effectiveness of Bermuda Grass as Vegetative Cover in Grassed Waterway: A Simulated Study — P. K. Mishra, J. K. Neelkanth, B. Maheswara Babu, and S. S. Kumathe; 132 (3), 288-92 (2006).

Furrow irrigation
Efficient Solution of the Coupled One-Dimensional Surface—Two-Dimensional Subsurface Flow during Furrow Irrigation Advance — Th. Wöhling, A. Fröhner, G. H. Schmitz, and R. Liedl; 132 (4), 380-8 (2006).

Sensitivity Analysis of Soil Hydraulic Properties on Subsurface Water Flow in Furrows — David Rocha, Fariborz Abbasi, and Jan Feyen; 132 (4), 418-24 (2006).

Fuzzy sets
Fuzzy Analysis of Slope-Area Discharge Estimates — Richard H. McCuen and Zachary Knight; 132 (1), 64-9 (2006).

Estimating Evaporation Using ANFIS — Özlem Terzi, M. Erol Keskin, and E. Dilek Taylan; 132 (5), 503-7 (2006).

Gates
Dimensionless Stage–Discharge Relationship in Radial Gates — M. A. Shahrokhnia and M. Javan; 132 (2), 180-4 (2006).

Geographic information systems
Irrigation Potential of the TRASVASE System (Santa Elena Peninsula, Guayas, Ecuador) — Camilo Cornejo, Dorota Z. Haman, Ramon L. Espinel, and Jonathan Jordan; 132 (5), 453-62 (2006).

Development of GIS-Based Model to Estimate Relative Reductions in Crop Yield due to Salinity and Waterlogging — Luis A. Garcia, Nathan Foged, and Grant E. Cardon; 132 (6), 553-63 (2006).

Grasses
Effectiveness of Bermuda Grass as Vegetative Cover in Grassed Waterway: A Simulated Study — P. K. Mishra, J. K. Neelkanth, B. Maheswara Babu, and S. S. Kumathe; 132 (3), 288-92 (2006).

Ground water
Flow Depletion of Semipervious Streams Due to Unsteady Pumping Discharge — Sushil K. Singh; 132 (4), 406-9 (2006).

Ground-water flow
Seepage from a Rectangular Ditch to the Groundwater Table — Serdar Korkmaz and Halil Önder; 132 (3), 263-71 (2006).

Decreasing Measuring Errors of a Thermal Groundwater Flowmeter — Dardo O. Guaraglia and Jorge L. Pousa; 132 (3), 284-7 (2006).

Ground-water management
Flow Depletion Induced by Pumping Well from Finite Length of Stream — Sushil K. Singh; 132 (5), 508-12 (2006).

Ground-water pollution
Impact of Agriculture on Water Quality in the North Carolina Middle Coastal Plain — Michael D. Dukes and Robert O. Evans; 132 (3), 250-62 (2006).

Ground-water quality
Evaluating Regional Solutions to Salinization and Waterlogging in an Irrigated River Valley — J. Philip Burkhalter and Timothy K. Gates; 132 (1), 21-30 (2006).

Head loss
Real Local Losses Estimation for On-Line Emitters Using Empirical and Numerical Procedures — Guillermo Palau-Salvador, Luis H. Sanchis, Pablo González-Altozano, and Jaime Arviza-Valverde; 132 (6), 522-30 (2006).

Hydraulic design
Hydraulic Analysis and Direct Design of Multiple Outlets Pipelines Laid on Flat and Sloping Lands — Gürol Yıldırım; 132 (6), 537-52 (2006).

Hydraulic engineering
Nonlinear PLS Method for Side Weir Flows — A. S. Ramamurthy, Junying Qu, and Diep Vo; 132 (5), 486-9 (2006).

Hydraulic models
Evaluating Regional Solutions to Salinization and Waterlogging in an Irrigated River Valley — J. Philip Burkhalter and Timothy K. Gates; 132 (1), 21-30 (2006).

Soil Hydraulic Properties Affecting Discharge Uniformity of Gravity-Fed Subsurface Drip Irrigation Systems — N. Lazarovitch, U. Shani, T. L. Thompson, and A. W. Warrick; 132 (6), 531-6 (2006).

Hydraulic properties
Sensitivity Analysis of Soil Hydraulic Properties on Subsurface Water Flow in Furrows — David Rocha, Fariborz Abbasi, and Jan Feyen; 132 (4), 418-24 (2006).

Hydraulic roughness
Errors in the Bed Shear Stress as Estimated from Vertical Velocity Profile — Guoliang Yu and Soon-Keat Tan; 132 (5), 490-7 (2006).

Hydraulics
Estimating Evaporation from Bare Soil Using Soil Moisture Data — Francesca Ventura, Richard L. Snyder, and Khaled M. Bali; 132 (2), 153-8 (2006).

Tuning of Robust Distant Downstream PI Controllers for an Irrigation Canal Pool. I: Theory — X. Litrico and V. Fromion; 132 (4), 359-68 (2006).

Tuning of Robust Distant Downstream PI Controllers for an Irrigation Canal Pool. II: Implementation Issues — X. Litrico, V. Fromion, and J.-P. Baume; 132 (4), 369-79 (2006).

Hydrographs
Optimal Instantaneous Unit Hydrograph from Multistorm Data — Sushil K. Singh; 132 (3), 298-302 (2006).

Storm-Water Predictions by Dimensionless Unit Hydrograph — James C. Y. Guo; 132 (4), 410-7 (2006).

Instantaneous Unit Hydrograph Evaluation for Rainfall-Runoff Modeling of Small Watersheds in North and South Central Texas — Theodore G. Cleveland, Xin He, William H. Asquith, Xing Fang, and David B. Thompson; 132 (5), 479-85 (2006).

NRCS (SCS) Synthetic Curvilinear Dimensionless Unit Hydrograph — Raymond I. Jeng; 132 (6), 627-31 (2006).

Hydrologic models
Hydrologic Modeling Inventory: Cooperative Research Effort — Vijay P. Singh, Donald K. Frevert, Jeffrey D. Rieker, Verne Leverson, Susan Meyer, and Steffen Meyer; 132 (2), 98-103 (2006).

Assessment of Soil Moisture Dynamics of the Nebraska Sandhills Using Long-Term Measurements and a Hydrology Model — V. Sridhar, K. G. Hubbard, and D. A. Wedin; 132 (5), 463-73 (2006).

Parameter Estimation for the Nonlinear Muskingum Model Using the BFGS Technique — Zong Woo Geem; 132 (5), 474-8 (2006).

Modified Kostiakov Infiltration Function: Accounting for Initial and Boundary Conditions — A. Furman, A. W. Warrick, D. Zerihun, and C. A. Sanchez; 132 (6), 587-96 (2006).

Hydrology
Fuzzy Analysis of Slope-Area Discharge Estimates — Richard H. McCuen and Zachary Knight; 132 (1), 64-9 (2006).

Watershed and River Systems Management Program: Overview of Capabilities — Donald Frevert, Terrance Fulp, Edith Zagona, George Leavesley, and Harry Lins; 132 (2), 92-7 (2006).

Stochastic Streamflow Simulation Using *SAMS-2003* — J. D. Salas, O. G. Sveinsson, W. L. Lane, and D. K. Frevert; 132 (2), 112-22 (2006).

Evaluating Bioretention Hydrology and Nutrient Removal at Three Field Sites in North Carolina — W. F. Hunt, A. R. Jarrett, J. T. Smith, and L. J. Sharkey; 132 (6), 600-8 (2006).

Implementation
Tuning of Robust Distant Downstream PI Controllers for an Irrigation Canal Pool. II: Implementation Issues — X. Litrico, V. Fromion, and J.-P. Baume; 132 (4), 369-79 (2006).

India
Simplified Kernel Method for Flow to Large Diameter Wells — Sushil K. Singh; 132 (1), 77-9 (2006).

Performance Evaluation of Reference Evapotranspiration Equations across a Range of Indian Climates — Lakshman Nandagiri and Gicy M. Kovoor; 132 (3), 238-49 (2006).

Infiltration
Grass Swale-Perforated Pipe Systems for Stormwater Management — H. Abida and J. F. Sabourin; 132 (1), 55-63 (2006).

Efficient Solution of the Coupled One-Dimensional Surface—Two-Dimensional Subsurface Flow during Furrow Irrigation Advance — Th. Wöhling, A. Fröhner, G. H. Schmitz, and R. Liedl; 132 (4), 380-8 (2006).

Modified Kostiakov Infiltration Function: Accounting for Initial and Boundary Conditions — A. Furman, A. W. Warrick, D. Zerihun, and C. A. Sanchez; 132 (6), 587-96 (2006).

Injection
Diagnostic Curve for Estimating Soil Dispersivity and Instantaneously Injected Mass — Sushil K. Singh; 132 (3), 281-3 (2006).

Irrigation
Estimation of Evapotranspiration of Different-Sized Navel-Orange Tree Orchards Using Energy Balance — Simona Consoli, Neil O'Connell, and Richard Snyder; 132 (1), 2-8 (2006).

Measurement of Light Interception by Navel Orange Orchard Canopies: Case Study of Lindsay, California — Simona Consoli, Neil O'Connell, and Richard Snyder; 132 (1), 9-20 (2006).

Evaluating Regional Solutions to Salinization and Waterlogging in an Irrigated River Valley — J. Philip Burkhalter and Timothy K. Gates; 132 (1), 21-30 (2006).

Investigation of the Influence of Sprinkler Fins and Dissolved Air on Jet Flow — M. Pascal, N. Kadem, and A. Tchiftchibachian; 132 (1), 41-6 (2006).

Optimal Reservoir Operation for Irrigation of Multiple Crops Using Genetic Algorithms — D. Nagesh Kumar, K. Srinivasa Raju, and B. Ashok; 132 (2), 123-9 (2006).

Optimal Reservoir Operations for Irrigation Using a Three Spatial Scales Approach — Francesco Mannocchi and Francesca Todisco; 132 (2), 130-42 (2006).

Effect of Controlled Drainage and Vegetative Buffers on Drainage Water Quality from Wastewater Irrigated Fields — Z. Jia, R. O. Evans, and J. T. Smith; 132 (2), 159-70 (2006).

Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Theory — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 198-207 (2006).

Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Simulation Results — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 208-19 (2006).

Irrigation Scheduling with Travel Times — Tonny T. de Vries and Arif A. Anwar; 132 (3), 220-7 (2006).

Optimal Irrigation Planning under Water Scarcity — A. Srinivasa Prasad, N. V. Umamahesh, and G. K. Viswanath; 132 (3), 228-37 (2006).

Performance-Based Optimization of Land and Water Resources within Irrigation Schemes. II: Application — Ian K. Smout, Sunil D. Gorantiwar, and K. Vairavamoorthy; 132 (4), 341-8 (2006).

Tuning of Robust Distant Downstream PI Controllers for an Irrigation Canal Pool. I: Theory — X. Litrico and V. Fromion; 132 (4), 359-68 (2006).

Tuning of Robust Distant Downstream PI Controllers for an Irrigation Canal Pool. II: Implementation Issues — X. Litrico, V. Fromion, and J.-P. Baume; 132 (4), 369-79 (2006).

Calibration of Electromagnetic Induction for Regional Assessment of Soil Water Salinity in an Irrigated Valley — James M. Wittler, Grant E. Cardon, Timothy K. Gates, Curtis A. Cooper, and P. Lorenz Sutherland; 132 (5), 436-44 (2006).

Set Sprinkler Irrigation and Its Cost — José Nicolás Ortiz Romero, Jesús Montero Martínez, Roberto Simón Martínez, and José María Tarjuelo Martín-Benito; 132 (5), 445-52 (2006).

Irrigation Potential of the TRASVASE System (Santa Elena Peninsula, Guayas, Ecuador) — Camilo Cornejo, Dorota Z. Haman, Ramon L. Espinel, and Jonathan Jordan; 132 (5), 453-62 (2006).

Development of GIS-Based Model to Estimate Relative Reductions in Crop Yield due to Salinity and Waterlogging — Luis A. Garcia, Nathan Foged, and Grant E. Cardon; 132 (6), 553-63 (2006).

Managing Irrigation for Better River Ecosystems—A Case Study of the Middle Rio Grande — Ramchand Oad and Rachel Kullman; 132 (6), 579-86 (2006).

Irrigation districts

Model for the Simulation of Water Flows in Irrigation Districts. I: Description — S. Lecina and E. Playán; 132 (4), 310-21 (2006).

Model for the Simulation of Water Flows in Irrigation Districts. II: Application — S. Lecina and E. Playán; 132 (4), 322-31 (2006).

Irrigation practices

Regional Salinity Modeling for Conjunctive Water Use Planning in Kheri Command — M. J. Kaledhonkar and Ashok K. Keshari; 132 (4), 389-98 (2006).

Irrigation scheduling

Optimal Irrigation Planning under Water Scarcity — A. Srinivasa Prasad, N. V. Umamahesh, and G. K. Viswanath; 132 (3), 228-37 (2006).

Productivity and Equity of Different Irrigation Schedules under Limited Water Supply — I. K. Smout and S. D. Gorantiwar; 132 (4), 349-58 (2006).

Regional Salinity Modeling for Conjunctive Water Use Planning in Kheri Command — M. J. Kaledhonkar and Ashok K. Keshari; 132 (4), 389-98 (2006).

Irrigation systems

Performance-Based Optimization of Land and Water Resources within Irrigation Schemes. I: Method — Sunil D. Gorantiwar, Ian K. Smout, and K. Vairavamoorthy; 132 (4), 332-40 (2006).

Economic Analysis of an Irrigation System for Liquid Manure Application — Tihomir Ancev and Arthur L. Stoecker; 132 (4), 399-405 (2006).

Irrigation water

Regional Salinity Modeling for Conjunctive Water Use Planning in Kheri Command — M. J. Kaledhonkar and Ashok K. Keshari; 132 (4), 389-98 (2006).

Isotropic materials

Diagnostic Curve for Estimating Soil Dispersivity and Instantaneously Injected Mass — Sushil K. Singh; 132 (3), 281-3 (2006).

Kinematic wave theory

Storm-Water Predictions by Dimensionless Unit Hydrograph — James C. Y. Guo; 132 (4), 410-7 (2006).

Laboratory tests

Flow Patterns and Energy Dissipation over Various Stepped Chutes — Chaiyuth Chinnarasri and Somchai Wongwises; 132 (1), 70-6 (2006).

Lakes

Estimating Evaporation Using ANFIS — Özlem Terzi, M. Erol Keskin, and E. Dilek Taylan; 132 (5), 503-7 (2006).

Light, natural

Measurement of Light Interception by Navel Orange Orchard Canopies: Case Study of Lindsay, California — Simona Consoli, Neil O'Connell, and Richard Snyder; 132 (1), 9-20 (2006).

Mass

Diagnostic Curve for Estimating Soil Dispersivity and Instantaneously Injected Mass — Sushil K. Singh; 132 (3), 281-3 (2006).

Mathematical models

Hydrologic Modeling Inventory: Cooperative Research Effort — Vijay P. Singh, Donald K. Frevert, Jeffrey D. Rieker, Verne Leverson, Susan Meyer, and Steffen Meyer; 132 (2), 98-103 (2006).

Efficient Solution of the Coupled One-Dimensional Surface—Two-Dimensional Subsurface Flow during Furrow Irrigation Advance — Th. Wöhling, A. Fröhner, G. H. Schmitz, and R. Liedl; 132 (4), 380-8 (2006).

Measurement

Measurement of Light Interception by Navel Orange Orchard Canopies: Case Study of Lindsay, California — Simona Consoli, Neil O'Connell, and Richard Snyder; 132 (1), 9-20 (2006).

Estimating Evaporation from Bare Soil Using Soil Moisture Data — Francesca Ventura, Richard L. Snyder, and Khaled M. Bali; 132 (2), 153-8 (2006).

Method for Measurement of Canopy Interception under Sprinkler Irrigation — Qing-Gai Wang, Yaohu Kang, Hai-Jun Liu, and Shi-Ping Liu; 132 (2), 185-7 (2006).

Assessment of Soil Moisture Dynamics of the Nebraska Sandhills Using Long-Term Measurements and a Hydrology Model — V. Sridhar, K. G. Hubbard, and D. A. Wedin; 132 (5), 463-73 (2006).

Models

Watershed and River Systems Management Program: Overview of Capabilities — Donald Frevert, Terrance Fulp, Edith Zagona, George Leavesley, and Harry Lins; 132 (2), 92-7 (2006).

Parameter Estimation for the Nonlinear Muskingum Model Using the BFGS Technique — Zong Woo Geem; 132 (5), 474-8 (2006).

Development of GIS-Based Model to Estimate Relative Reductions in Crop Yield due to Salinity and Waterlogging — Luis A. Garcia, Nathan Foged, and Grant E. Cardon; 132 (6), 553-63 (2006).

Moisture

Considerations for the Design of Intercepting Drainage for Collecting Water from Seep Areas — Daniel Bucur and Paul Savu; 132 (6), 597-9 (2006).

Moisture content

Modified Kostiakov Infiltration Function: Accounting for Initial and Boundary Conditions — A. Furman, A. W. Warrick, D. Zerihun, and C. A. Sanchez; 132 (6), 587-96 (2006).

Nebraska

Assessment of Soil Moisture Dynamics of the Nebraska Sandhills Using Long-Term Measurements and a Hydrology Model — V. Sridhar, K. G. Hubbard, and D. A. Wedin; 132 (5), 463-73 (2006).

Neural networks

Estimating Evaporation Using ANFIS — Özlem Terzi, M. Erol Keskin, and E. Dilek Taylan; 132 (5), 503-7 (2006).

Nitrates

Impact of Agriculture on Water Quality in the North Carolina Middle Coastal Plain — Michael D. Dukes and Robert O. Evans; 132 (3), 250-62 (2006).

Nitrogen

Impact of Agriculture on Water Quality in the North Carolina Middle Coastal Plain — Michael D. Dukes and Robert O. Evans; 132 (3), 250-62 (2006).

Nonlinear analysis

Optimal Instantaneous Unit Hydrograph from Multistorm Data — Sushil K. Singh; 132 (3), 298-302 (2006).

North Carolina

Evaluating Bioretention Hydrology and Nutrient Removal at Three Field Sites in North Carolina — W. F. Hunt, A. R. Jarrett, J. T. Smith, and L. J. Sharkey; 132 (6), 600-8 (2006).

Nutrient loads

Evaluating Bioretention Hydrology and Nutrient Removal at Three Field Sites in North Carolina — W. F. Hunt, A. R. Jarrett, J. T. Smith, and L. J. Sharkey; 132 (6), 600-8 (2006).

Nutrients

Impact of Agriculture on Water Quality in the North Carolina Middle Coastal Plain — Michael D. Dukes and Robert O. Evans; 132 (3), 250-62 (2006).

Offshore construction
Considerations for Storm-Water Outfalls off Exposed Coasts — Robert A. Grace; 132 (6), 609-18 (2006).

Open channel flow
Salt River Project Canal Automation Pilot Project: Simulation Tests — E. Bautista, A. J. Clemmens, and R. J. Strand; 132 (2), 143-52 (2006).

VOF Model for Simulation of a Free Overfall in Trapezoidal Channels — A. S. Ramamurthy, Junying Qu, and Diep Vo; 132 (4), 425-8 (2006).

Minimum Specific Energy and Critical Flow Conditions in Open Channels — H. Chanson; 132 (5), 498-502 (2006).

Open channels
Optimal Design of Open Channel Section Incorporating Critical Flow Condition — Rajib Kumar Bhattacharjya; 132 (5), 513-8 (2006).

Optimization
Optimal Reservoir Operation for Irrigation of Multiple Crops Using Genetic Algorithms — D. Nagesh Kumar, K. Srinivasa Raju, and B. Ashok; 132 (2), 123-9 (2006).

Optimal Reservoir Operations for Irrigation Using a Three Spatial Scales Approach — Francesco Mannocchi and Francesca Todisco; 132 (2), 130-42 (2006).

Optimal Instantaneous Unit Hydrograph from Multistorm Data — Sushil K. Singh; 132 (3), 298-302 (2006).

Performance-Based Optimization of Land and Water Resources within Irrigation Schemes. I: Method — Sunil D. Gorantiwar, Ian K. Smout, and K. Vairavamoorthy; 132 (4), 332-40 (2006).

Performance-Based Optimization of Land and Water Resources within Irrigation Schemes. II: Application — Ian K. Smout, Sunil D. Gorantiwar, and K. Vairavamoorthy; 132 (4), 341-8 (2006).

Parameter Estimation for the Nonlinear Muskingum Model Using the BFGS Technique — Zong Woo Geem; 132 (5), 474-8 (2006).

Flow Depletion Induced by Pumping Well from Finite Length of Stream — Sushil K. Singh; 132 (5), 508-12 (2006).

Seepage to a Drainage Ditch and Optimization of Its Shape — A. R. Kacimov; 132 (6), 619-22 (2006).

Optimization models
Irrigation Scheduling with Travel Times — Tonny T. de Vries and Arif A. Anwar; 132 (3), 220-7 (2006).

Optimal Irrigation Planning under Water Scarcity — A. Srinivasa Prasad, N. V. Umamahesh, and G. K. Viswanath; 132 (3), 228-37 (2006).

Optimal Design of Open Channel Section Incorporating Critical Flow Condition — Rajib Kumar Bhattacharjya; 132 (5), 513-8 (2006).

Outfall sewers
Considerations for Storm-Water Outfalls off Exposed Coasts — Robert A. Grace; 132 (6), 609-18 (2006).

Outflow
Total Friction Loss along Multiple Outlets Pipes with Open End — Reynaldo R. Chinea and Antonio Dominguez; 132 (1), 31-40 (2006).

Overland flow
Efficient Solution of the Coupled One-Dimensional Surface—Two-Dimensional Subsurface Flow during Furrow Irrigation Advance — Th. Wöhling, A. Fröhner, G. H. Schmitz, and R. Liedl; 132 (4), 380-8 (2006).

Parameters
Optimal Instantaneous Unit Hydrograph from Multistorm Data — Sushil K. Singh; 132 (3), 298-302 (2006).

Parameter Estimation for the Nonlinear Muskingum Model Using the BFGS Technique — Zong Woo Geem; 132 (5), 474-8 (2006).

Peak flow
NRCS (SCS) Synthetic Curvilinear Dimensionless Unit Hydrograph — Raymond I. Jeng; 132 (6), 627-31 (2006).

Performance characteristics
Performance Evaluation of Reference Evapotranspiration Equations across a Range of Indian Climates — Lakshman Nandagiri and Gicy M. Kovoor; 132 (3), 238-49 (2006).

Performance-Based Optimization of Land and Water Resources within Irrigation Schemes. II: Application — Ian K. Smout, Sunil D. Gorantiwar, and K. Vairavamoorthy; 132 (4), 341-8 (2006).

Pipe flow
Total Friction Loss along Multiple Outlets Pipes with Open End — Reynaldo R. Chinea and Antonio Dominguez; 132 (1), 31-40 (2006).

Porous media
Decreasing Measuring Errors of a Thermal Groundwater Flowmeter — Dardo O. Guaraglia and Jorge L. Pousa; 132 (3), 284-7 (2006).

Capillarity and Evaporation Exacerbated Seepage Losses from Unlined Channels — A. R. Kacimov; 132 (6), 623-6 (2006).

Potential flow
Seepage from a Rectangular Ditch to the Groundwater Table — Serdar Korkmaz and Halil Önder; 132 (3), 263-71 (2006).

Predictions
VOF Model for Simulation of a Free Overfall in Trapezoidal Channels — A. S. Ramamurthy, Junying Qu, and Diep Vo; 132 (4), 425-8 (2006).

Productivity
Productivity and Equity of Different Irrigation Schedules under Limited Water Supply — I. K. Smout and S. D. Gorantiwar; 132 (4), 349-58 (2006).

Pumps
Simplified Kernel Method for Flow to Large Diameter Wells — Sushil K. Singh; 132 (1), 77-9 (2006).

Flow Depletion of Semipervious Streams Due to Unsteady Pumping Discharge — Sushil K. Singh; 132 (4), 406-9 (2006).

Flow Depletion Induced by Pumping Well from Finite Length of Stream — Sushil K. Singh; 132 (5), 508-12 (2006).

Radiation
Measurement of Light Interception by Navel Orange Orchard Canopies: Case Study of Lindsay, California — Simona Consoli, Neil O'Connell, and Richard Snyder; 132 (1), 9-20 (2006).

Rainfall
Hydrologic Modeling Inventory: Cooperative Research Effort — Vijay P. Singh, Donald K. Frevert, Jeffrey D. Rieker, Verne Leverson, Susan Meyer, and Steffen Meyer; 132 (2), 98-103 (2006).

Optimal Instantaneous Unit Hydrograph from Multistorm Data — Sushil K. Singh; 132 (3), 298-302 (2006).

Storm-Water Predictions by Dimensionless Unit Hydrograph — James C. Y. Guo; 132 (4), 410-7 (2006).

Instantaneous Unit Hydrograph Evaluation for Rainfall-Runoff Modeling of Small Watersheds in North and South Central Texas — Theodore G. Cleveland, Xin He, William H. Asquith, Xing Fang, and David B. Thompson; 132 (5), 479-85 (2006).

Ramps
Energy Dissipation on Reinforced Block Ramps — Stefano Pagliara and Pietro Chiavaccini; 132 (3), 293-7 (2006).

Reservoir management
Model for the Simulation of Water Flows in Irrigation Districts. I: Description — S. Lecina and E. Playán; 132 (4), 310-21 (2006).

Model for the Simulation of Water Flows in Irrigation Districts. II: Application — S. Lecina and E. Playán; 132 (4), 322-31 (2006).

Reservoir operation
Watershed and River Systems Management Program: Overview of Capabilities — Donald Frevert, Terrance Fulp, Edith Zagona, George Leavesley, and Harry Lins; 132 (2), 92-7 (2006).

Modeling Uncertainty in an Object-Oriented Reservoir Operations Model — John C. Carron, Edith A. Zagona, and Terrance J. Fulp; 132 (2), 104-11 (2006).

Optimal Reservoir Operation for Irrigation of Multiple Crops Using Genetic Algorithms — D. Nagesh Kumar, K. Srinivasa Raju, and B. Ashok; 132 (2), 123-9 (2006).

Optimal Reservoir Operations for Irrigation Using a Three Spatial Scales Approach — Francesco Mannocchi and Francesca Todisco; 132 (2), 130-42 (2006).

Resource management
Optimal Irrigation Planning under Water Scarcity — A. Srinivasa Prasad, N. V. Umamahesh, and G. K. Viswanath; 132 (3), 228-37 (2006).

Retention basins
Performances of Hydraulics and Bedload Sediment Flushing in Rigid Channel Using Surge Flows — Guoliang Yu and Soon-Keat Tan; 132 (2), 171-9 (2006).

Riprap
Energy Dissipation on Reinforced Block Ramps — Stefano Pagliara and Pietro Chiavaccini; 132 (3), 293-7 (2006).

River systems
Watershed and River Systems Management Program: Overview of Capabilities — Donald Frevert, Terrance Fulp, Edith Zagona, George Leavesley, and Harry Lins; 132 (2), 92-7 (2006).

Managing Irrigation for Better River Ecosystems—A Case Study of the Middle Rio Grande — Ramchand Oad and Rachel Kullman;

132 (6), 579-86 (2006).

Roughness

Effectiveness of Bermuda Grass as Vegetative Cover in Grassed Waterway: A Simulated Study — P. K. Mishra, J. K. Neelkanth, B. Maheswara Babu, and S. S. Kumathe; 132 (3), 288-92 (2006).

Runoff

Grass Swale-Perforated Pipe Systems for Stormwater Management — H. Abida and J. F. Sabourin; 132 (1), 55-63 (2006).

Watershed and River Systems Management Program: Overview of Capabilities — Donald Frevert, Terrance Fulp, Edith Zagona, George Leavesley, and Harry Lins; 132 (2), 92-7 (2006).

Hydrologic Modeling Inventory: Cooperative Research Effort — Vijay P. Singh, Donald K. Frevert, Jeffrey D. Rieker, Verne Leverson, Susan Meyer, and Steffen Meyer; 132 (2), 98-103 (2006).

Optimal Instantaneous Unit Hydrograph from Multistorm Data — Sushil K. Singh; 132 (3), 298-302 (2006).

Storm-Water Predictions by Dimensionless Unit Hydrograph — James C. Y. Guo; 132 (4), 410-7 (2006).

Instantaneous Unit Hydrograph Evaluation for Rainfall-Runoff Modeling of Small Watersheds in North and South Central Texas — Theodore G. Cleveland, Xin He, William H. Asquith, Xing Fang, and David B. Thompson; 132 (5), 479-85 (2006).

NRCS (SCS) Synthetic Curvilinear Dimensionless Unit Hydrograph — Raymond I. Jeng; 132 (6), 627-31 (2006).

Saline ground water

Regional Salinity Modeling for Conjunctive Water Use Planning in Kheri Command — M. J. Kaledhonkar and Ashok K. Keshari; 132 (4), 389-98 (2006).

Salinity

Evaluating Regional Solutions to Salinization and Waterlogging in an Irrigated River Valley — J. Philip Burkhalter and Timothy K. Gates; 132 (1), 21-30 (2006).

Regional Salinity Modeling for Conjunctive Water Use Planning in Kheri Command — M. J. Kaledhonkar and Ashok K. Keshari; 132 (4), 389-98 (2006).

Calibration of Electromagnetic Induction for Regional Assessment of Soil Water Salinity in an Irrigated Valley — James M. Wittler, Grant E. Cardon, Timothy K. Gates, Curtis A. Cooper, and P. Lorenz Sutherland; 132 (5), 436-44 (2006).

Development of GIS-Based Model to Estimate Relative Reductions in Crop Yield due to Salinity and Waterlogging — Luis A. Garcia, Nathan Foged, and Grant E. Cardon; 132 (6), 553-63 (2006).

Scheduling

Irrigation Scheduling with Travel Times — Tonny T. de Vries and Arif A. Anwar; 132 (3), 220-7 (2006).

Sediment

Effectiveness of Bermuda Grass as Vegetative Cover in Grassed Waterway: A Simulated Study — P. K. Mishra, J. K. Neelkanth, B. Maheswara Babu, and S. S. Kumathe; 132 (3), 288-92 (2006).

Sediment deposits

Performances of Hydraulics and Bedload Sediment Flushing in Rigid Channel Using Surge Flows — Guoliang Yu and Soon-Keat Tan; 132 (2), 171-9 (2006).

Seepage

Impact of Agriculture on Water Quality in the North Carolina Middle Coastal Plain — Michael D. Dukes and Robert O. Evans; 132 (3), 250-62 (2006).

Seepage to a Drainage Ditch and Optimization of Its Shape — A. R. Kacimov; 132 (6), 619-22 (2006).

Capillarity and Evaporation Exacerbated Seepage Losses from Unlined Channels — A. R. Kacimov; 132 (6), 623-6 (2006).

Sensitivity analyses

Fuzzy Analysis of Slope-Area Discharge Estimates — Richard H. McCuen and Zachary Knight; 132 (1), 64-9 (2006).

Sensitivity analysis

Sensitivity Analysis of Soil Hydraulic Properties on Subsurface Water Flow in Furrows — David Rocha, Fariborz Abbasi, and Jan Feyen; 132 (4), 418-24 (2006).

Sensitivity Analyses and Sensitivity Coefficients of Standardized Daily ASCE-Penman-Monteith Equation — Suat Irmak, José O. Payero, Derrel L. Martin, Ayse Irmak, and Terry A. Howell; 132 (6), 564-78 (2006).

Shear stress

Errors in the Bed Shear Stress as Estimated from Vertical Velocity Profile — Guoliang Yu and Soon-Keat Tan; 132 (5), 490-7 (2006).

Simulation

Combination Subsurface Irrigation and Drainage Systems in North-Central South Dakota — Darrell W. DeBoer and Dwayne L. Beck; 132 (1), 47-54 (2006).

Stochastic Streamflow Simulation Using *SAMS-2003* — J. D. Salas, O. G. Sveinsson, W. L. Lane, and D. K. Frevert; 132 (2), 112-22 (2006).

Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Theory — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 198-207 (2006).

Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Simulation Results — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 208-19 (2006).

Simulation models

Regional Salinity Modeling for Conjunctive Water Use Planning in Kheri Command — M. J. Kaledhonkar and Ashok K. Keshari; 132 (4), 389-98 (2006).

Slopes

Fuzzy Analysis of Slope-Area Discharge Estimates — Richard H. McCuen and Zachary Knight; 132 (1), 64-9 (2006).

Hydraulic Analysis and Direct Design of Multiple Outlets Pipelines Laid on Flat and Sloping Lands — Gürol Yıldırım; 132 (6), 537-52 (2006).

Considerations for the Design of Intercepting Drainage for Collecting Water from Seep Areas — Daniel Bucur and Paul Savu; 132 (6), 597-9 (2006).

Soil permeability

Soil Hydraulic Properties Affecting Discharge Uniformity of Gravity-Fed Subsurface Drip Irrigation Systems — N. Lazarovitch, U. Shani, T. L. Thompson, and A. W. Warrick; 132 (6), 531-6 (2006).

Soil pollution

Diagnostic Curve for Estimating Soil Dispersivity and Instantaneously Injected Mass — Sushil K. Singh; 132 (3), 281-3 (2006).

Soil properties

Estimating Evaporation from Bare Soil Using Soil Moisture Data — Francesca Ventura, Richard L. Snyder, and Khaled M. Bali; 132 (2), 153-8 (2006).

Sensitivity Analysis of Soil Hydraulic Properties on Subsurface Water Flow in Furrows — David Rocha, Fariborz Abbasi, and Jan Feyen; 132 (4), 418-24 (2006).

Soil water

Estimating Evaporation from Bare Soil Using Soil Moisture Data — Francesca Ventura, Richard L. Snyder, and Khaled M. Bali; 132 (2), 153-8 (2006).

Assessment of Soil Moisture Dynamics of the Nebraska Sandhills Using Long-Term Measurements and a Hydrology Model — V. Sridhar, K. G. Hubbard, and D. A. Wedin; 132 (5), 463-73 (2006).

Considerations for the Design of Intercepting Drainage for Collecting Water from Seep Areas — Daniel Bucur and Paul Savu; 132 (6), 597-9 (2006).

Soils

Calibration of Electromagnetic Induction for Regional Assessment of Soil Water Salinity in an Irrigated Valley — James M. Wittler, Grant E. Cardon, Timothy K. Gates, Curtis A. Cooper, and P. Lorenz Sutherland; 132 (5), 436-44 (2006).

Solutes

Regional Salinity Modeling for Conjunctive Water Use Planning in Kheri Command — M. J. Kaledhonkar and Ashok K. Keshari; 132 (4), 389-98 (2006).

South Dakota

Combination Subsurface Irrigation and Drainage Systems in North-Central South Dakota — Darrell W. DeBoer and Dwayne L. Beck; 132 (1), 47-54 (2006).

Spatial distribution

Soil Hydraulic Properties Affecting Discharge Uniformity of Gravity-Fed Subsurface Drip Irrigation Systems — N. Lazarovitch, U. Shani, T. L. Thompson, and A. W. Warrick; 132 (6), 531-6 (2006).

Spillways

Minimum Specific Energy and Critical Flow Conditions in Open Channels — H. Chanson; 132 (5), 498-502 (2006).

Spreadsheets

Parameter Estimation for the Nonlinear Muskingum Model Using the BFGS Technique — Zong Woo Geem; 132 (5), 474-8 (2006).

Sprinkler irrigation

Method for Measurement of Canopy Interception under Sprinkler Irrigation — Qing-Gai Wang,

Yaohu Kang, Hai-Jun Liu, and Shi-Ping Liu; 132 (2), 185-7 (2006).

Set Sprinkler Irrigation and Its Cost — José Nicolás Ortiz Romero, Jesús Montero Martínez, Roberto Simón Martínez, and José María Tarjuelo Martín-Benito; 132 (5), 445-52 (2006).

Statistics

Performance Evaluation of Reference Evapotranspiration Equations across a Range of Indian Climates — Lakshman Nandagiri and Gicy M. Kovoor; 132 (3), 238-49 (2006).

Stochastic models

Modeling Uncertainty in an Object-Oriented Reservoir Operations Model — John C. Carron, Edith A. Zagona, and Terrance J. Fulp; 132 (2), 104-11 (2006).

Stochastic processes

Stochastic Streamflow Simulation Using *SAMS-2003* — J. D. Salas, O. G. Sveinsson, W. L. Lane, and D. K. Frevert; 132 (2), 112-22 (2006).

Storm sewers

Considerations for Storm-Water Outfalls off Exposed Coasts — Robert A. Grace; 132 (6), 609-18 (2006).

Stormwater management

Grass Swale-Perforated Pipe Systems for Stormwater Management — H. Abida and J. F. Sabourin; 132 (1), 55-63 (2006).

Storm-Water Predictions by Dimensionless Unit Hydrograph — James C. Y. Guo; 132 (4), 410-7 (2006).

Evaluating Bioretention Hydrology and Nutrient Removal at Three Field Sites in North Carolina — W. F. Hunt, A. R. Jarrett, J. T. Smith, and L. J. Sharkey; 132 (6), 600-8 (2006).

Considerations for Storm-Water Outfalls off Exposed Coasts — Robert A. Grace; 132 (6), 609-18 (2006).

Streamflow

Stochastic Streamflow Simulation Using *SAMS-2003* — J. D. Salas, O. G. Sveinsson, W. L. Lane, and D. K. Frevert; 132 (2), 112-22 (2006).

Flow Depletion of Semipervious Streams Due to Unsteady Pumping Discharge — Sushil K. Singh; 132 (4), 406-9 (2006).

Flow Depletion Induced by Pumping Well from Finite Length of Stream — Sushil K. Singh; 132 (5), 508-12 (2006).

Streams

Flow Depletion of Semipervious Streams Due to Unsteady Pumping Discharge — Sushil K. Singh; 132 (4), 406-9 (2006).

Subirrigation

Combination Subsurface Irrigation and Drainage Systems in North-Central South Dakota — Darrell W. DeBoer and Dwayne L. Beck; 132 (1), 47-54 (2006).

Submerged flow

Dimensionless Stage–Discharge Relationship in Radial Gates — M. A. Shahrokhnia and M. Javan; 132 (2), 180-4 (2006).

Subsurface flow

Efficient Solution of the Coupled One-Dimensional Surface—Two-Dimensional Subsurface Flow during Furrow Irrigation Advance — Th. Wöhling, A. Fröhner, G. H. Schmitz, and R. Liedl; 132 (4), 380-8 (2006).

Sensitivity Analysis of Soil Hydraulic Properties on Subsurface Water Flow in Furrows — David Rocha, Fariborz Abbasi, and Jan Feyen; 132 (4), 418-24 (2006).

Surface irrigation

Model for the Simulation of Water Flows in Irrigation Districts. I: Description — S. Lecina and E. Playán; 132 (4), 310-21 (2006).

Model for the Simulation of Water Flows in Irrigation Districts. II: Application — S. Lecina and E. Playán; 132 (4), 322-31 (2006).

Modified Kostiakov Infiltration Function: Accounting for Initial and Boundary Conditions — A. Furman, A. W. Warrick, D. Zerihun, and C. A. Sanchez; 132 (6), 587-96 (2006).

Surface water

Flow Depletion of Semipervious Streams Due to Unsteady Pumping Discharge — Sushil K. Singh; 132 (4), 406-9 (2006).

Surface waters

Hydrologic Modeling Inventory: Cooperative Research Effort — Vijay P. Singh, Donald K. Frevert, Jeffrey D. Rieker, Verne Leverson, Susan Meyer, and Steffen Meyer; 132 (2), 98-103 (2006).

Impact of Agriculture on Water Quality in the North Carolina Middle Coastal Plain — Michael D. Dukes and Robert O. Evans; 132 (3), 250-62 (2006).

Surge

Performances of Hydraulics and Bedload Sediment Flushing in Rigid Channel Using Surge Flows — Guoliang Yu and Soon-Keat Tan; 132 (2), 171-9 (2006).

Texas

Instantaneous Unit Hydrograph Evaluation for Rainfall-Runoff Modeling of Small Watersheds in North and South Central Texas — Theodore G. Cleveland, Xin He, William H. Asquith, Xing Fang, and David B. Thompson; 132 (5), 479-85 (2006).

Theories

Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Theory — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 198-207 (2006).

Tuning of Robust Distant Downstream PI Controllers for an Irrigation Canal Pool. I: Theory — X. Litrico and V. Fromion; 132 (4), 359-68 (2006).

Thermal factors

Decreasing Measuring Errors of a Thermal Groundwater Flowmeter — Dardo O. Guaraglia and Jorge L. Pousa; 132 (3), 284-7 (2006).

Transient flow

Flow Depletion Induced by Pumping Well from Finite Length of Stream — Sushil K. Singh; 132 (5), 508-12 (2006).

Travel time

Irrigation Scheduling with Travel Times — Tonny T. de Vries and Arif A. Anwar; 132 (3), 220-7 (2006).

Trickle irrigation

Real Local Losses Estimation for On-Line Emitters Using Empirical and Numerical Procedures — Guillermo Palau-Salvador, Luis H. Sanchis, Pablo González-Altozano, and Jaime Arviza-Valverde; 132 (6), 522-30 (2006).

Soil Hydraulic Properties Affecting Discharge Uniformity of Gravity-Fed Subsurface Drip Irrigation Systems — N. Lazarovitch, U. Shani, T. L. Thompson, and A. W. Warrick; 132 (6), 531-6 (2006).

Tubes

Investigation of the Influence of Sprinkler Fins and Dissolved Air on Jet Flow — M. Pascal, N. Kadem, and A. Tchiftchibachian; 132 (1), 41-6 (2006).

Turbulence

VOF Model for Simulation of a Free Overfall in Trapezoidal Channels — A. S. Ramamurthy, Junying Qu, and Diep Vo; 132 (4), 425-8 (2006).

Real Local Losses Estimation for On-Line Emitters Using Empirical and Numerical Procedures — Guillermo Palau-Salvador, Luis H. Sanchis, Pablo González-Altozano, and Jaime Arviza-Valverde; 132 (6), 522-30 (2006).

Turkey

Estimating Evaporation Using ANFIS — Özlem Terzi, M. Erol Keskin, and E. Dilek Taylan; 132 (5), 503-7 (2006).

Two phase flow

Investigation of the Influence of Sprinkler Fins and Dissolved Air on Jet Flow — M. Pascal, N. Kadem, and A. Tchiftchibachian; 132 (1), 41-6 (2006).

Two-dimensional models

Efficient Solution of the Coupled One-Dimensional Surface—Two-Dimensional Subsurface Flow during Furrow Irrigation Advance — Th. Wöhling, A. Fröhner, G. H. Schmitz, and R. Liedl; 132 (4), 380-8 (2006).

Uncertainty principles

Modeling Uncertainty in an Object-Oriented Reservoir Operations Model — John C. Carron, Edith A. Zagona, and Terrance J. Fulp; 132 (2), 104-11 (2006).

Underwater pipelines

Considerations for Storm-Water Outfalls off Exposed Coasts — Robert A. Grace; 132 (6), 609-18 (2006).

Uniform flow

Soil Hydraulic Properties Affecting Discharge Uniformity of Gravity-Fed Subsurface Drip Irrigation Systems — N. Lazarovitch, U. Shani, T. L. Thompson, and A. W. Warrick; 132 (6), 531-6 (2006).

Unsteady flow

Flow Depletion of Semipervious Streams Due to Unsteady Pumping Discharge — Sushil K. Singh; 132 (4), 406-9 (2006).

Validation

Performance Evaluation of Reference Evapotranspiration Equations across a Range of Indian Climates — Lakshman Nandagiri and Gicy M. Kovoor; 132 (3), 238-49 (2006).

Vegetation

Effect of Controlled Drainage and Vegetative Buffers on Drainage Water Quality from Wastewater Irrigated Fields — Z. Jia, R. O. Evans, and J. T. Smith; 132 (2), 159-70 (2006).

Effectiveness of Bermuda Grass as Vegetative Cover in Grassed Waterway: A Simulated Study

— P. K. Mishra, J. K. Neelkanth, B. Maheswara Babu, and S. S. Kumathe; 132 (3), 288-92 (2006).

Velocity

Fuzzy Analysis of Slope-Area Discharge Estimates — Richard H. McCuen and Zachary Knight; 132 (1), 64-9 (2006).

Decreasing Measuring Errors of a Thermal Groundwater Flowmeter — Dardo O. Guaraglia and Jorge L. Pousa; 132 (3), 284-7 (2006).

Errors in the Bed Shear Stress as Estimated from Vertical Velocity Profile — Guoliang Yu and Soon-Keat Tan; 132 (5), 490-7 (2006).

Waste management

Economic Analysis of an Irrigation System for Liquid Manure Application — Tihomir Ancev and Arthur L. Stoecker; 132 (4), 399-405 (2006).

Wastewater

Effect of Controlled Drainage and Vegetative Buffers on Drainage Water Quality from Wastewater Irrigated Fields — Z. Jia, R. O. Evans, and J. T. Smith; 132 (2), 159-70 (2006).

Water distribution systems

Irrigation Scheduling with Travel Times — Tonny T. de Vries and Arif A. Anwar; 132 (3), 220-7 (2006).

Water flow

Model for the Simulation of Water Flows in Irrigation Districts. I: Description — S. Lecina and E. Playán; 132 (4), 310-21 (2006).

Modified Kostiakov Infiltration Function: Accounting for Initial and Boundary Conditions — A. Furman, A. W. Warrick, D. Zerihun, and C. A. Sanchez; 132 (6), 587-96 (2006).

Water jets

Investigation of the Influence of Sprinkler Fins and Dissolved Air on Jet Flow — M. Pascal, N. Kadem, and A. Tchiftchibachian; 132 (1), 41-6 (2006).

Water levels

Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Theory — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 198-207 (2006).

Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Simulation Results — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 208-19 (2006).

Water management

Model for the Simulation of Water Flows in Irrigation Districts. I: Description — S. Lecina and E. Playán; 132 (4), 310-21 (2006).

Model for the Simulation of Water Flows in Irrigation Districts. II: Application — S. Lecina and E. Playán; 132 (4), 322-31 (2006).

Set Sprinkler Irrigation and Its Cost — José Nicolás Ortiz Romero, Jesús Montero Martínez, Roberto Simón Martínez, and José María Tarjuelo Martín-Benito; 132 (5), 445-52 (2006).

Managing Irrigation for Better River Ecosystems—A Case Study of the Middle Rio Grande — Ramchand Oad and Rachel Kullman; 132 (6), 579-86 (2006).

Water Pipelines

Hydraulic Analysis and Direct Design of Multiple Outlets Pipelines Laid on Flat and Sloping Lands — Gürol Yıldırım; 132 (6), 537-52 (2006).

Water quality

Effect of Controlled Drainage and Vegetative Buffers on Drainage Water Quality from Wastewater Irrigated Fields — Z. Jia, R. O. Evans, and J. T. Smith; 132 (2), 159-70 (2006).

Impact of Agriculture on Water Quality in the North Carolina Middle Coastal Plain — Michael D. Dukes and Robert O. Evans; 132 (3), 250-62 (2006).

Evaluating Bioretention Hydrology and Nutrient Removal at Three Field Sites in North Carolina — W. F. Hunt, A. R. Jarrett, J. T. Smith, and L. J. Sharkey; 132 (6), 600-8 (2006).

Water resources

Watershed and River Systems Management Program: Overview of Capabilities — Donald Frevert, Terrance Fulp, Edith Zagona, George Leavesley, and Harry Lins; 132 (2), 92-7 (2006).

Performance-Based Optimization of Land and Water Resources within Irrigation Schemes. I: Method — Sunil D. Gorantiwar, Ian K. Smout, and K. Vairavamoorthy; 132 (4), 332-40 (2006).

Performance-Based Optimization of Land and Water Resources within Irrigation Schemes. II: Application — Ian K. Smout, Sunil D. Gorantiwar, and K. Vairavamoorthy; 132 (4), 341-8 (2006).

Water supply

Productivity and Equity of Different Irrigation Schedules under Limited Water Supply — I. K. Smout and S. D. Gorantiwar; 132 (4), 349-58 (2006).

Water table

Evaluating Regional Solutions to Salinization and Waterlogging in an Irrigated River Valley — J. Philip Burkhalter and Timothy K. Gates; 132 (1), 21-30 (2006).

Seepage from a Rectangular Ditch to the Groundwater Table — Serdar Korkmaz and Halil Önder; 132 (3), 263-71 (2006).

Development of GIS-Based Model to Estimate Relative Reductions in Crop Yield due to Salinity and Waterlogging — Luis A. Garcia, Nathan Foged, and Grant E. Cardon; 132 (6), 553-63 (2006).

Seepage to a Drainage Ditch and Optimization of Its Shape — A. R. Kacimov; 132 (6), 619-22 (2006).

Water use

Irrigation Potential of the TRASVASE System (Santa Elena Peninsula, Guayas, Ecuador) — Camilo Cornejo, Dorota Z. Haman, Ramon L. Espinel, and Jonathan Jordan; 132 (5), 453-62 (2006).

Watershed management

Watershed and River Systems Management Program: Overview of Capabilities — Donald Frevert, Terrance Fulp, Edith Zagona, George Leavesley, and Harry Lins; 132 (2), 92-7 (2006).

Waterways

Effectiveness of Bermuda Grass as Vegetative Cover in Grassed Waterway: A Simulated Study — P. K. Mishra, J. K. Neelkanth, B. Maheswara Babu, and S. S. Kumathe; 132 (3), 288-92 (2006).

Wave propagation

Performances of Hydraulics and Bedload Sediment Flushing in Rigid Channel Using Surge Flows — Guoliang Yu and Soon-Keat Tan; 132 (2), 171-9 (2006).

Weirs

Broad-Crested Weirs with Rectangular Compound Cross Sections — M. Gögüş, Z. Defne, and V. Özkandemir; 132 (3), 272-80 (2006).

Nonlinear PLS Method for Side Weir Flows — A. S. Ramamurthy, Junying Qu, and Diep Vo; 132 (5), 486-9 (2006).

Minimum Specific Energy and Critical Flow Conditions in Open Channels — H. Chanson; 132 (5), 498-502 (2006).

Wells

Simplified Kernel Method for Flow to Large Diameter Wells — Sushil K. Singh; 132 (1), 77-9 (2006).

Flow Depletion Induced by Pumping Well from Finite Length of Stream — Sushil K. Singh; 132 (5), 508-12 (2006).

Author Index

Abbasi, Fariborz
Sensitivity Analysis of Soil Hydraulic Properties on Subsurface Water Flow in Furrows — David Rocha, Fariborz Abbasi, and Jan Feyen; 132 (4), 418-24 (2006).

Abida, H.
Grass Swale-Perforated Pipe Systems for Stormwater Management — H. Abida and J. F. Sabourin; 132 (1), 55-63 (2006).

Ağiralioğlu, Necati
Closure to "Comparative Analysis of Hydraulic Calculation Methods in Design of Microirrigation Laterals" by Gürol Yildirim and Necati Ağiralioğlu — Gürol Yıldırım and Necati Ağiralioğlu; 132 (1), 85-8 (2006).

Altan-Sakarya, A. Burcu
Discussion of "Generalized Head-Discharge Equation for Flow over Sharp-Crested Inclined Inverted V-Notch Weir" by M. N. Shesha Prakash and A. V. Shivapur — A. Burcu Altan-Sakarya; 132 (1), 80-1 (2006).
Discussion of "Uniform and Critical Flow Computations" by Ramappa G. Patil, J. S. R. Murthy, and L. K. Ghosh — A. Burcu Altan-Sakarya; 132 (6), 634 (2006).

Anastasiadou-Partheniou, E.
Discussion of "End Depth–Discharge Relation at Free Overfall of Trapezoidal Channels" by A. S. Ramamurthy, Chao Zhai, and Junying Qu — E. Anastasiadou-Partheniou, E. Hatzigiannakis, and G. Terzidis; 132 (3), 306-7 (2006).

Ancev, Tihomir
Economic Analysis of an Irrigation System for Liquid Manure Application — Tihomir Ancev and Arthur L. Stoecker; 132 (4), 399-405 (2006).

Anwar, Arif A.
Irrigation Scheduling with Travel Times — Tonny T. de Vries and Arif A. Anwar; 132 (3), 220-7 (2006).

Arviza-Valverde, Jaime
Real Local Losses Estimation for On-Line Emitters Using Empirical and Numerical Procedures — Guillermo Palau-Salvador, Luis H. Sanchis, Pablo González-Altozano, and Jaime Arviza-Valverde; 132 (6), 522-30 (2006).

Ashok, B.
Optimal Reservoir Operation for Irrigation of Multiple Crops Using Genetic Algorithms — D. Nagesh Kumar, K. Srinivasa Raju, and B. Ashok; 132 (2), 123-9 (2006).

Asquith, William H.
Instantaneous Unit Hydrograph Evaluation for Rainfall-Runoff Modeling of Small Watersheds in North and South Central Texas — Theodore G. Cleveland, Xin He, William H. Asquith, Xing Fang, and David B. Thompson; 132 (5), 479-85 (2006).

Bali, Khaled M.
Estimating Evaporation from Bare Soil Using Soil Moisture Data — Francesca Ventura, Richard L. Snyder, and Khaled M. Bali; 132 (2), 153-8 (2006).

Baume, J.-P.
Tuning of Robust Distant Downstream PI Controllers for an Irrigation Canal Pool. II: Implementation Issues — X. Litrico, V. Fromion, and J.-P. Baume; 132 (4), 369-79 (2006).

Bautista, E.
Salt River Project Canal Automation Pilot Project: Simulation Tests — E. Bautista, A. J. Clemmens, and R. J. Strand; 132 (2), 143-52 (2006).

Beck, Dwayne L.
Combination Subsurface Irrigation and Drainage Systems in North-Central South Dakota — Darrell W. DeBoer and Dwayne L. Beck; 132 (1), 47-54 (2006).

Bhallamudi, S. Murty
Closure to "Gradually Varied Flow Computation in Cyclic Looped Channel Networks" by H. Prashanth Reddy and S. Murty Bhallamudi — H. Prashanth Reddy and S. Murty Bhallamudi; 132 (2), 189 (2006).

Bhattacharjya, Rajib Kumar
Optimal Design of Open Channel Section Incorporating Critical Flow Condition — Rajib Kumar Bhattacharjya; 132 (5), 513-8 (2006).

Bucur, Daniel
Considerations for the Design of Intercepting Drainage for Collecting Water from Seep Areas — Daniel Bucur and Paul Savu; 132 (6), 597-9 (2006).

Burkhalter, J. Philip
Evaluating Regional Solutions to Salinization and Waterlogging in an Irrigated River Valley — J. Philip Burkhalter and Timothy K. Gates; 132 (1), 21-30 (2006).

Cardon, Grant E.
Calibration of Electromagnetic Induction for Regional Assessment of Soil Water Salinity in an Irrigated Valley — James M. Wittler, Grant E. Cardon, Timothy K. Gates, Curtis A. Cooper, and P. Lorenz Sutherland; 132 (5), 436-44 (2006).
Development of GIS-Based Model to Estimate Relative Reductions in Crop Yield due to Salinity and Waterlogging — Luis A. Garcia, Nathan Foged, and Grant E. Cardon; 132 (6), 553-63 (2006).

Carron, John C.
Modeling Uncertainty in an Object-Oriented Reservoir Operations Model — John C. Carron, Edith A. Zagona, and Terrance J. Fulp; 132 (2), 104-11 (2006).

Chahar, Bhagu R.
Closure to "Determination of Length of a Horizontal Drain in Homogeneous Earth Dams" by Bhagu R. Chahar — Bhagu R. Chahar; 132 (1), 89-90 (2006).

Chanson, H.
Minimum Specific Energy and Critical Flow Conditions in Open Channels — H. Chanson; 132 (5), 498-502 (2006).

Chiavaccini, Pietro
Energy Dissipation on Reinforced Block Ramps — Stefano Pagliara and Pietro Chiavaccini; 132 (3), 293-7 (2006).

Chinea, Reynaldo R.
Total Friction Loss along Multiple Outlets Pipes with Open End — Reynaldo R. Chinea and Antonio Dominguez; 132 (1), 31-40 (2006).

Chinnarasri, Chaiyuth
Flow Patterns and Energy Dissipation over Various Stepped Chutes — Chaiyuth Chinnarasri and Somchai Wongwises; 132 (1), 70-6 (2006).

Clemmens, Albert J.
Salt River Project Canal Automation Pilot Project: Simulation Tests — E. Bautista, A. J. Clemmens, and R. J. Strand; 132 (2), 143-52 (2006).
Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Theory — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 198-207 (2006).
Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Simulation Results — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 208-19 (2006).

Cleveland, Theodore G.
Instantaneous Unit Hydrograph Evaluation for Rainfall-Runoff Modeling of Small Watersheds in North and South Central Texas — Theodore G. Cleveland, Xin He, William H. Asquith, Xing Fang, and David B. Thompson; 132 (5), 479-85 (2006).

Consoli, Simona
Estimation of Evapotranspiration of Different-Sized Navel-Orange Tree Orchards Using Energy Balance — Simona Consoli, Neil O'Connell, and Richard Snyder; 132 (1), 2-8 (2006).
Measurement of Light Interception by Navel Orange Orchard Canopies: Case Study of Lindsay, California — Simona Consoli, Neil O'Connell, and Richard Snyder; 132 (1), 9-20 (2006).

Cooper, Curtis A.
Calibration of Electromagnetic Induction for Regional Assessment of Soil Water Salinity in an Irrigated Valley — James M. Wittler, Grant E. Cardon, Timothy K. Gates, Curtis A. Cooper, and P. Lorenz Sutherland; 132 (5), 436-44 (2006).

Cornejo, Camilo
Irrigation Potential of the TRASVASE System (Santa Elena Peninsula, Guayas, Ecuador) — Camilo Cornejo, Dorota Z. Haman, Ramon L. Espinel, and Jonathan Jordan; 132 (5), 453-62 (2006).

DeBoer, Darrell W.
Combination Subsurface Irrigation and Drainage Systems in North-Central South Dakota — Darrell W. DeBoer and Dwayne L. Beck; 132 (1), 47-54 (2006).

Defne, Z.
Broad-Crested Weirs with Rectangular Compound Cross Sections — M. Göğüş, Z. Defne, and V.

Özkandemir; 132 (3), 272-80 (2006).

de Vries, Tonny T.

Irrigation Scheduling with Travel Times — Tonny T. de Vries and Arif A. Anwar; 132 (3), 220-7 (2006).

Dominguez, Antonio

Total Friction Loss along Multiple Outlets Pipes with Open End — Reynaldo R. Chinea and Antonio Dominguez; 132 (1), 31-40 (2006).

Dukes, Michael D.

Impact of Agriculture on Water Quality in the North Carolina Middle Coastal Plain — Michael D. Dukes and Robert O. Evans; 132 (3), 250-62 (2006).

Espinel, Ramon L.

Irrigation Potential of the TRASVASE System (Santa Elena Peninsula, Guayas, Ecuador) — Camilo Cornejo, Dorota Z. Haman, Ramon L. Espinel, and Jonathan Jordan; 132 (5), 453-62 (2006).

Evans, Robert O.

Effect of Controlled Drainage and Vegetative Buffers on Drainage Water Quality from Wastewater Irrigated Fields — Z. Jia, R. O. Evans, and J. T. Smith; 132 (2), 159-70 (2006).

Impact of Agriculture on Water Quality in the North Carolina Middle Coastal Plain — Michael D. Dukes and Robert O. Evans; 132 (3), 250-62 (2006).

Fang, Xing

Instantaneous Unit Hydrograph Evaluation for Rainfall-Runoff Modeling of Small Watersheds in North and South Central Texas — Theodore G. Cleveland, Xin He, William H. Asquith, Xing Fang, and David B. Thompson; 132 (5), 479-85 (2006).

Feyen, Jan

Sensitivity Analysis of Soil Hydraulic Properties on Subsurface Water Flow in Furrows — David Rocha, Fariborz Abbasi, and Jan Feyen; 132 (4), 418-24 (2006).

Foged, Nathan

Development of GIS-Based Model to Estimate Relative Reductions in Crop Yield due to Salinity and Waterlogging — Luis A. Garcia, Nathan Foged, and Grant E. Cardon; 132 (6), 553-63 (2006).

Frevert, Donald K.

Watershed and River Systems Management Program: Overview of Capabilities — Donald Frevert, Terrance Fulp, Edith Zagona, George Leavesley, and Harry Lins; 132 (2), 92-7 (2006).

Hydrologic Modeling Inventory: Cooperative Research Effort — Vijay P. Singh, Donald K. Frevert, Jeffrey D. Rieker, Verne Leverson, Susan Meyer, and Steffen Meyer; 132 (2), 98-103 (2006).

Stochastic Streamflow Simulation Using *SAMS-2003* — J. D. Salas, O. G. Sveinsson, W. L. Lane, and D. K. Frevert; 132 (2), 112-22 (2006).

Fröhner, A.

Efficient Solution of the Coupled One-Dimensional Surface—Two-Dimensional Subsurface Flow during Furrow Irrigation Advance — Th. Wöhling, A. Fröhner, G. H. Schmitz, and R. Liedl; 132 (4), 380-8 (2006).

Fromion, V.

Tuning of Robust Distant Downstream PI Controllers for an Irrigation Canal Pool. I: Theory — X. Litrico and V. Fromion; 132 (4), 359-68 (2006).

Tuning of Robust Distant Downstream PI Controllers for an Irrigation Canal Pool. II: Implementation Issues — X. Litrico, V. Fromion, and J.-P. Baume; 132 (4), 369-79 (2006).

Fulp, Terrance J.

Watershed and River Systems Management Program: Overview of Capabilities — Donald Frevert, Terrance Fulp, Edith Zagona, George Leavesley, and Harry Lins; 132 (2), 92-7 (2006).

Modeling Uncertainty in an Object-Oriented Reservoir Operations Model — John C. Carron, Edith A. Zagona, and Terrance J. Fulp; 132 (2), 104-11 (2006).

Furman, A.

Modified Kostiakov Infiltration Function: Accounting for Initial and Boundary Conditions — A. Furman, A. W. Warrick, D. Zerihun, and C. A. Sanchez; 132 (6), 587-96 (2006).

Garcia, Luis A.

Development of GIS-Based Model to Estimate Relative Reductions in Crop Yield due to Salinity and Waterlogging — Luis A. Garcia, Nathan Foged, and Grant E. Cardon; 132 (6), 553-63 (2006).

Garg, N. K.

Discussion of "Gradually Varied Flow Computation in Cyclic Looped Channel Networks" by H. Prashanth Reddy and S. Murty Bhallamudi — N. K. Garg and D. J. Sen; 132 (2), 188 (2006).

Gates, Timothy K.

Evaluating Regional Solutions to Salinization and Waterlogging in an Irrigated River Valley — J. Philip Burkhalter and Timothy K. Gates; 132 (1), 21-30 (2006).

Calibration of Electromagnetic Induction for Regional Assessment of Soil Water Salinity in an Irrigated Valley — James M. Wittler, Grant E. Cardon, Timothy K. Gates, Curtis A. Cooper, and P. Lorenz Sutherland; 132 (5), 436-44 (2006).

Geem, Zong Woo

Parameter Estimation for the Nonlinear Muskingum Model Using the BFGS Technique — Zong Woo Geem; 132 (5), 474-8 (2006).

Ghare, A. D.

Discussion of "Simplified Estimation of Reference Evapotranspiration from Pan Evaporation Data in California" by Richard L. Snyder, Morteza Orang, Scott Matyac, and Mark E. Grismer — A. D. Ghare, P. D. Porey, and R. N. Ingle; 132 (5), 519-20 (2006).

Ghosh, L. K.

Closure to "Uniform and Critical Flow Computations" by Ramappa G. Patil, J. S. R. Murthy, and L. K. Ghosh — Ramappa G. Patil, J. S. R. Murthy, and L. K. Ghosh; 132 (6), 637 (2006).

Göğüş, M.

Broad-Crested Weirs with Rectangular Compound Cross Sections — M. Göğüş, Z. Defne, and V. Özkandemir; 132 (3), 272-80 (2006).

González-Altozano, Pablo

Real Local Losses Estimation for On-Line Emitters Using Empirical and Numerical Procedures — Guillermo Palau-Salvador, Luis H. Sanchis, Pablo González-Altozano, and Jaime Arviza-Valverde; 132 (6), 522-30 (2006).

Gorantiwar, Sunil D.

Performance-Based Optimization of Land and Water Resources within Irrigation Schemes. I: Method — Sunil D. Gorantiwar, Ian K. Smout, and K. Vairavamoorthy; 132 (4), 332-40 (2006).

Performance-Based Optimization of Land and Water Resources within Irrigation Schemes. II: Application — Ian K. Smout, Sunil D. Gorantiwar, and K. Vairavamoorthy; 132 (4), 341-8 (2006).

Productivity and Equity of Different Irrigation Schedules under Limited Water Supply — I. K. Smout and S. D. Gorantiwar; 132 (4), 349-58 (2006).

Grace, Robert A.

Considerations for Storm-Water Outfalls off Exposed Coasts — Robert A. Grace; 132 (6), 609-18 (2006).

Guaraglia, Dardo O.

Decreasing Measuring Errors of a Thermal Groundwater Flowmeter — Dardo O. Guaraglia and Jorge L. Pousa; 132 (3), 284-7 (2006).

Guo, James C. Y.

Storm-Water Predictions by Dimensionless Unit Hydrograph — James C. Y. Guo; 132 (4), 410-7 (2006).

Haman, Dorota Z.

Irrigation Potential of the TRASVASE System (Santa Elena Peninsula, Guayas, Ecuador) — Camilo Cornejo, Dorota Z. Haman, Ramon L. Espinel, and Jonathan Jordan; 132 (5), 453-62 (2006).

Hatzigiannakis, E.

Discussion of "End Depth–Discharge Relation at Free Overfall of Trapezoidal Channels" by A. S. Ramamurthy, Chao Zhai, and Junying Qu — E. Anastasiadou-Partheniou, E. Hatzigiannakis, and G. Terzidis; 132 (3), 306-7 (2006).

He, Xin

Instantaneous Unit Hydrograph Evaluation for Rainfall-Runoff Modeling of Small Watersheds in North and South Central Texas — Theodore G. Cleveland, Xin He, William H. Asquith, Xing Fang, and David B. Thompson; 132 (5), 479-85 (2006).

Howell, Terry A.

Sensitivity Analyses and Sensitivity Coefficients of Standardized Daily ASCE-Penman-Monteith Equation — Suat Irmak, José O. Payero, Derrel L. Martin, Ayse Irmak, and Terry A. Howell; 132 (6), 564-78 (2006).

Hubbard, K. G.

Assessment of Soil Moisture Dynamics of the Nebraska Sandhills Using Long-Term Measurements and a Hydrology Model — V. Sridhar, K. G. Hubbard, and D. A. Wedin; 132 (5), 463-73 (2006).

Hunt, W. F.

Evaluating Bioretention Hydrology and Nutrient Removal at Three Field Sites in North Carolina — W. F. Hunt, A. R. Jarrett, J. T. Smith, and L. J. Sharkey; 132 (6), 600-8 (2006).

Ingle, R. N.

Discussion of "Simplified Estimation of Reference Evapotranspiration from Pan Evaporation Data in California" by Richard L. Snyder, Morteza Orang, Scott Matyac, and Mark E. Grismer — A. D. Ghare, P. D. Porey, and R. N. Ingle; 132 (5), 519-20 (2006).

Irmak, Ayse

Sensitivity Analyses and Sensitivity Coefficients of Standardized Daily ASCE-Penman-Monteith Equation — Suat Irmak, José O. Payero, Derrel

L. Martin, Ayse Irmak, and Terry A. Howell; 132 (6), 564-78 (2006).

Irmak, Suat

Sensitivity Analyses and Sensitivity Coefficients of Standardized Daily ASCE-Penman-Monteith Equation — Suat Irmak, José O. Payero, Derrel L. Martin, Ayse Irmak, and Terry A. Howell; 132 (6), 564-78 (2006).

Jarrett, A. R.

Evaluating Bioretention Hydrology and Nutrient Removal at Three Field Sites in North Carolina — W. F. Hunt, A. R. Jarrett, J. T. Smith, and L. J. Sharkey; 132 (6), 600-8 (2006).

Javan, M.

Dimensionless Stage–Discharge Relationship in Radial Gates — M. A. Shahrokhnia and M. Javan; 132 (2), 180-4 (2006).

Jeng, Raymond I.

NRCS (SCS) Synthetic Curvilinear Dimensionless Unit Hydrograph — Raymond I. Jeng; 132 (6), 627-31 (2006).

Jia, Z.

Effect of Controlled Drainage and Vegetative Buffers on Drainage Water Quality from Wastewater Irrigated Fields — Z. Jia, R. O. Evans, and J. T. Smith; 132 (2), 159-70 (2006).

Jordan, Jonathan

Irrigation Potential of the TRASVASE System (Santa Elena Peninsula, Guayas, Ecuador) — Camilo Cornejo, Dorota Z. Haman, Ramon L. Espinel, and Jonathan Jordan; 132 (5), 453-62 (2006).

Kacimov, A. R.

Seepage to a Drainage Ditch and Optimization of Its Shape — A. R. Kacimov; 132 (6), 619-22 (2006).

Capillarity and Evaporation Exacerbated Seepage Losses from Unlined Channels — A. R. Kacimov; 132 (6), 623-6 (2006).

Kadem, N.

Investigation of the Influence of Sprinkler Fins and Dissolved Air on Jet Flow — M. Pascal, N. Kadem, and A. Tchiftchibachian; 132 (1), 41-6 (2006).

Kaledhonkar, M. J.

Regional Salinity Modeling for Conjunctive Water Use Planning in Kheri Command — M. J. Kaledhonkar and Ashok K. Keshari; 132 (4), 389-98 (2006).

Kang, Yaohu

Method for Measurement of Canopy Interception under Sprinkler Irrigation — Qing-Gai Wang, Yaohu Kang, Hai-Jun Liu, and Shi-Ping Liu; 132 (2), 185-7 (2006).

Keshari, Ashok K.

Regional Salinity Modeling for Conjunctive Water Use Planning in Kheri Command — M. J. Kaledhonkar and Ashok K. Keshari; 132 (4), 389-98 (2006).

Keskin, M. Erol

Estimating Evaporation Using ANFIS — Özlem Terzi, M. Erol Keskin, and E. Dilek Taylan; 132 (5), 503-7 (2006).

Knight, Zachary

Fuzzy Analysis of Slope-Area Discharge Estimates — Richard H. McCuen and Zachary Knight; 132 (1), 64-9 (2006).

Korkmaz, Serdar

Seepage from a Rectangular Ditch to the Groundwater Table — Serdar Korkmaz and Halil Önder; 132 (3), 263-71 (2006).

Kovoor, Gicy M.

Performance Evaluation of Reference Evapotranspiration Equations across a Range of Indian Climates — Lakshman Nandagiri and Gicy M. Kovoor; 132 (3), 238-49 (2006).

Kullman, Rachel

Managing Irrigation for Better River Ecosystems—A Case Study of the Middle Rio Grande — Ramchand Oad and Rachel Kullman; 132 (6), 579-86 (2006).

Kumar, D. Nagesh

Optimal Reservoir Operation for Irrigation of Multiple Crops Using Genetic Algorithms — D. Nagesh Kumar, K. Srinivasa Raju, and B. Ashok; 132 (2), 123-9 (2006).

Kumathe, S. S.

Effectiveness of Bermuda Grass as Vegetative Cover in Grassed Waterway: A Simulated Study — P. K. Mishra, J. K. Neelkanth, B. Maheswara Babu, and S. S. Kumathe; 132 (3), 288-92 (2006).

Lane, W. L.

Stochastic Streamflow Simulation Using *SAMS-2003* — J. D. Salas, O. G. Sveinsson, W. L. Lane, and D. K. Frevert; 132 (2), 112-22 (2006).

Lazarovitch, N.

Soil Hydraulic Properties Affecting Discharge Uniformity of Gravity-Fed Subsurface Drip Irrigation Systems — N. Lazarovitch, U. Shani, T. L. Thompson, and A. W. Warrick; 132 (6), 531-6 (2006).

Leavesley, George

Watershed and River Systems Management Program: Overview of Capabilities — Donald Frevert, Terrance Fulp, Edith Zagona, George Leavesley, and Harry Lins; 132 (2), 92-7 (2006).

Lecina, S.

Model for the Simulation of Water Flows in Irrigation Districts. I: Description — S. Lecina and E. Playán; 132 (4), 310-21 (2006).

Model for the Simulation of Water Flows in Irrigation Districts. II: Application — S. Lecina and E. Playán; 132 (4), 322-31 (2006).

Leverson, Verne

Hydrologic Modeling Inventory: Cooperative Research Effort — Vijay P. Singh, Donald K. Frevert, Jeffrey D. Rieker, Verne Leverson, Susan Meyer, and Steffen Meyer; 132 (2), 98-103 (2006).

Liedl, R.

Efficient Solution of the Coupled One-Dimensional Surface—Two-Dimensional Subsurface Flow during Furrow Irrigation Advance — Th. Wöhling, A. Fröhner, G. H. Schmitz, and R. Liedl; 132 (4), 380-8 (2006).

Lins, Harry

Watershed and River Systems Management Program: Overview of Capabilities — Donald Frevert, Terrance Fulp, Edith Zagona, George Leavesley, and Harry Lins; 132 (2), 92-7 (2006).

Litrico, X.

Tuning of Robust Distant Downstream PI Controllers for an Irrigation Canal Pool. I: Theory — X. Litrico and V. Fromion; 132 (4), 359-68 (2006).

Tuning of Robust Distant Downstream PI Controllers for an Irrigation Canal Pool. II: Implementation Issues — X. Litrico, V. Fromion, and J.-P. Baume; 132 (4), 369-79 (2006).

Liu, Hai-Jun

Method for Measurement of Canopy Interception under Sprinkler Irrigation — Qing-Gai Wang, Yaohu Kang, Hai-Jun Liu, and Shi-Ping Liu; 132 (2), 185-7 (2006).

Liu, Shi-Ping

Method for Measurement of Canopy Interception under Sprinkler Irrigation — Qing-Gai Wang, Yaohu Kang, Hai-Jun Liu, and Shi-Ping Liu; 132 (2), 185-7 (2006).

Maheshwari, Basant

Book Reviews — Basant Maheshwari; 132 (2), 195 (2006).

Maheswara Babu, B.

Effectiveness of Bermuda Grass as Vegetative Cover in Grassed Waterway: A Simulated Study — P. K. Mishra, J. K. Neelkanth, B. Maheswara Babu, and S. S. Kumathe; 132 (3), 288-92 (2006).

Mannocchi, Francesco

Optimal Reservoir Operations for Irrigation Using a Three Spatial Scales Approach — Francesco Mannocchi and Francesca Todisco; 132 (2), 130-42 (2006).

Martin, Derrel L.

Sensitivity Analyses and Sensitivity Coefficients of Standardized Daily ASCE-Penman-Monteith Equation — Suat Irmak, José O. Payero, Derrel L. Martin, Ayse Irmak, and Terry A. Howell; 132 (6), 564-78 (2006).

Martínez, Jesús Montero

Set Sprinkler Irrigation and Its Cost — José Nicolás Ortiz Romero, Jesús Montero Martínez, Roberto Simón Martínez, and José María Tarjuelo Martín-Benito; 132 (5), 445-52 (2006).

Martínez, Roberto Simón

Set Sprinkler Irrigation and Its Cost — José Nicolás Ortiz Romero, Jesús Montero Martínez, Roberto Simón Martínez, and José María Tarjuelo Martín-Benito; 132 (5), 445-52 (2006).

McCuen, Richard H.

Fuzzy Analysis of Slope-Area Discharge Estimates — Richard H. McCuen and Zachary Knight; 132 (1), 64-9 (2006).

Meyer, Steffen

Hydrologic Modeling Inventory: Cooperative Research Effort — Vijay P. Singh, Donald K. Frevert, Jeffrey D. Rieker, Verne Leverson, Susan Meyer, and Steffen Meyer; 132 (2), 98-103 (2006).

Meyer, Susan

Hydrologic Modeling Inventory: Cooperative Research Effort — Vijay P. Singh, Donald K. Frevert, Jeffrey D. Rieker, Verne Leverson, Susan Meyer, and Steffen Meyer; 132 (2), 98-103 (2006).

Mini, K. M.

Discussion of "Exact Solutions for Sequent Depths Problem" by Prabhata K. Swamee and Pushpa N. Rathie — K. M. Mini; 132 (3), 303 (2006).

Mishra, P. K.

Effectiveness of Bermuda Grass as Vegetative Cover in Grassed Waterway: A Simulated Study — P. K. Mishra, J. K. Neelkanth, B. Maheswara Babu, and S. S. Kumathe; 132 (3), 288-92 (2006).

Murthy, J. S. R.
Closure to "Uniform and Critical Flow Computations" by Ramappa G. Patil, J. S. R. Murthy, and L. K. Ghosh — Ramappa G. Patil, J. S. R. Murthy, and L. K. Ghosh; 132 (6), 637 (2006).
Nandagiri, Lakshman
Performance Evaluation of Reference Evapotranspiration Equations across a Range of Indian Climates — Lakshman Nandagiri and Gicy M. Kovoor; 132 (3), 238-49 (2006).
Neelkanth, J. K.
Effectiveness of Bermuda Grass as Vegetative Cover in Grassed Waterway: A Simulated Study — P. K. Mishra, J. K. Neelkanth, B. Maheswara Babu, and S. S. Kumathe; 132 (3), 288-92 (2006).
Oad, Ramchand
Managing Irrigation for Better River Ecosystems—A Case Study of the Middle Rio Grande — Ramchand Oad and Rachel Kullman; 132 (6), 579-86 (2006).
O'Connell, Neil
Estimation of Evapotranspiration of Different-Sized Navel-Orange Tree Orchards Using Energy Balance — Simona Consoli, Neil O'Connell, and Richard Snyder; 132 (1), 2-8 (2006).
Measurement of Light Interception by Navel Orange Orchard Canopies: Case Study of Lindsay, California — Simona Consoli, Neil O'Connell, and Richard Snyder; 132 (1), 9-20 (2006).
Önder, Halil
Seepage from a Rectangular Ditch to the Groundwater Table — Serdar Korkmaz and Halil Önder; 132 (3), 263-71 (2006).
Ortiz Romero, José Nicolás
Set Sprinkler Irrigation and Its Cost — José Nicolás Ortiz Romero, Jesús Montero Martínez, Roberto Simón Martínez, and José María Tarjuelo Martín-Benito; 132 (5), 445-52 (2006).
Özkandemir, V.
Broad-Crested Weirs with Rectangular Compound Cross Sections — M. Göğüş, Z. Defne, and V. Özkandemir; 132 (3), 272-80 (2006).
Pagliara, Stefano
Energy Dissipation on Reinforced Block Ramps — Stefano Pagliara and Pietro Chiavaccini; 132 (3), 293-7 (2006).
Palau-Salvador, Guillermo
Discussion of "Comparative Analysis of Hydraulic Calculation Methods in Design of Microirrigation Laterals" by Gürol Yildirim and Necati Ağiralioğlu — Giuseppe Provenzano and Guillermo Palau-Salvador; 132 (1), 82-5 (2006).
Real Local Losses Estimation for On-Line Emitters Using Empirical and Numerical Procedures — Guillermo Palau-Salvador, Luis H. Sanchis, Pablo González-Altozano, and Jaime Arviza-Valverde; 132 (6), 522-30 (2006).
Pascal, M.
Investigation of the Influence of Sprinkler Fins and Dissolved Air on Jet Flow — M. Pascal, N. Kadem, and A. Tchiftchibachian; 132 (1), 41-6 (2006).
Patil, Ramappa G.
Closure to "Uniform and Critical Flow Computations" by Ramappa G. Patil, J. S. R. Murthy, and L. K. Ghosh — Ramappa G. Patil, J. S. R. Murthy, and L. K. Ghosh; 132 (6), 637 (2006).
Payero, José O.
Sensitivity Analyses and Sensitivity Coefficients of Standardized Daily ASCE-Penman-Monteith Equation — Suat Irmak, José O. Payero, Derrel L. Martin, Ayse Irmak, and Terry A. Howell; 132 (6), 564-78 (2006).
Playán, E.
Model for the Simulation of Water Flows in Irrigation Districts. I: Description — S. Lecina and E. Playán; 132 (4), 310-21 (2006).
Model for the Simulation of Water Flows in Irrigation Districts. II: Application — S. Lecina and E. Playán; 132 (4), 322-31 (2006).
Porey, P. D.
Discussion of "Simplified Estimation of Reference Evapotranspiration from Pan Evaporation Data in California" by Richard L. Snyder, Morteza Orang, Scott Matyac, and Mark E. Grismer — A. D. Ghare, P. D. Porey, and R. N. Ingle; 132 (5), 519-20 (2006).
Pousa, Jorge L.
Decreasing Measuring Errors of a Thermal Groundwater Flowmeter — Dardo O. Guaraglia and Jorge L. Pousa; 132 (3), 284-7 (2006).
Prakash, M. N. Shesha
Closure to "Generalized Head-Discharge Equation for Flow over Sharp-Crested Inclined Inverted V-Notch Weir" by M. N. Shesha Prakash and A. V. Shivapur — M. N. Shesha Prakash and A. V. Shivapur; 132 (1), 81-2 (2006).
Prasad, A. Srinivasa
Optimal Irrigation Planning under Water Scarcity — A. Srinivasa Prasad, N. V. Umamahesh, and G. K. Viswanath; 132 (3), 228-37 (2006).
Provenzano, Giuseppe
Discussion of "Comparative Analysis of Hydraulic Calculation Methods in Design of Microirrigation Laterals" by Gürol Yildirim and Necati Ağiralioğlu — Giuseppe Provenzano and Guillermo Palau-Salvador; 132 (1), 82-5 (2006).
Closure to "Experimental Analysis of Local Pressure Losses for Microirrigation Laterals" by Giuseppe Provenzano and Domenico Pumo — Giuseppe Provenzano and Domenico Pumo; 132 (2), 193-4 (2006).
Pumo, Domenico
Closure to "Experimental Analysis of Local Pressure Losses for Microirrigation Laterals" by Giuseppe Provenzano and Domenico Pumo — Giuseppe Provenzano and Domenico Pumo; 132 (2), 193-4 (2006).
Qu, Junying
Closure to "End Depth–Discharge Relation at Free Overfall of Trapezoidal Channels" by A. S. Ramamurthy, Chao Zhai, and Junying Qu — A. S. Ramamurthy, Chao Zhai, and Junying Qu; 132 (3), 307 (2006).
VOF Model for Simulation of a Free Overfall in Trapezoidal Channels — A. S. Ramamurthy, Junying Qu, and Diep Vo; 132 (4), 425-8 (2006).
Nonlinear PLS Method for Side Weir Flows — A. S. Ramamurthy, Junying Qu, and Diep Vo; 132 (5), 486-9 (2006).
Raju, K. Srinivasa
Optimal Reservoir Operation for Irrigation of Multiple Crops Using Genetic Algorithms — D. Nagesh Kumar, K. Srinivasa Raju, and B. Ashok; 132 (2), 123-9 (2006).
Ramamurthy, A. S.
Closure to "End Depth–Discharge Relation at Free Overfall of Trapezoidal Channels" by A. S. Ramamurthy, Chao Zhai, and Junying Qu — A. S. Ramamurthy, Chao Zhai, and Junying Qu; 132 (3), 307 (2006).
VOF Model for Simulation of a Free Overfall in Trapezoidal Channels — A. S. Ramamurthy, Junying Qu, and Diep Vo; 132 (4), 425-8 (2006).
Nonlinear PLS Method for Side Weir Flows — A. S. Ramamurthy, Junying Qu, and Diep Vo; 132 (5), 486-9 (2006).
Rathie, Pushpa N.
Closure to "Exact Solutions for Sequent Depths Problem" by Prabhata K. Swamee and Pushpa N. Rathie — Prabhata K. Swamee and Pushpa N. Rathie; 132 (3), 305-6 (2006).
Reddy, H. Prashanth
Closure to "Gradually Varied Flow Computation in Cyclic Looped Channel Networks" by H. Prashanth Reddy and S. Murty Bhallamudi — H. Prashanth Reddy and S. Murty Bhallamudi; 132 (2), 189 (2006).
Rieker, Jeffrey D.
Hydrologic Modeling Inventory: Cooperative Research Effort — Vijay P. Singh, Donald K. Frevert, Jeffrey D. Rieker, Verne Leverson, Susan Meyer, and Steffen Meyer; 132 (2), 98-103 (2006).
Ritter, William F.
Editor's Note — William F. Ritter; 132 (1), 1 (2006).
Editor's Note — William F. Ritter; 132 (2), 91 (2006).
Editor's Note — William F. Ritter; 132 (3), 197 (2006).
Editor's Note — William F. Ritter; 132 (4), 309 (2006).
Editor's Note — William F. Ritter; 132 (5), 435 (2006).
Editor's Note — William F. Ritter; 132 (6), 521 (2006).
Rocha, David
Sensitivity Analysis of Soil Hydraulic Properties on Subsurface Water Flow in Furrows — David Rocha, Fariborz Abbasi, and Jan Feyen; 132 (4), 418-24 (2006).
Sabourin, J. F.
Grass Swale-Perforated Pipe Systems for Stormwater Management — H. Abida and J. F. Sabourin; 132 (1), 55-63 (2006).
Salas, J. D.
Stochastic Streamflow Simulation Using *SAMS-2003* — J. D. Salas, O. G. Sveinsson, W. L. Lane, and D. K. Frevert; 132 (2), 112-22 (2006).
Sanchez, C. A.
Modified Kostiakov Infiltration Function: Accounting for Initial and Boundary Conditions — A. Furman, A. W. Warrick, D. Zerihun, and C. A. Sanchez; 132 (6), 587-96 (2006).
Sanchis, Luis H.
Real Local Losses Estimation for On-Line Emitters Using Empirical and Numerical Procedures — Guillermo Palau-Salvador, Luis H. Sanchis, Pablo González-Altozano, and Jaime Arviza-Valverde; 132 (6), 522-30 (2006).
Savu, Paul
Considerations for the Design of Intercepting Drainage for Collecting Water from Seep Areas

— Daniel Bucur and Paul Savu; 132 (6), 597-9 (2006).

Schmitz, G. H.

Efficient Solution of the Coupled One-Dimensional Surface—Two-Dimensional Subsurface Flow during Furrow Irrigation Advance — Th. Wöhling, A. Fröhner, G. H. Schmitz, and R. Liedl; 132 (4), 380-8 (2006).

Sen, D. J.

Discussion of "Gradually Varied Flow Computation in Cyclic Looped Channel Networks" by H. Prashanth Reddy and S. Murty Bhallamudi — N. K. Garg and D. J. Sen; 132 (2), 188 (2006).

Shahrokhnia, M. A.

Dimensionless Stage–Discharge Relationship in Radial Gates — M. A. Shahrokhnia and M. Javan; 132 (2), 180-4 (2006).

Shani, U.

Soil Hydraulic Properties Affecting Discharge Uniformity of Gravity-Fed Subsurface Drip Irrigation Systems — N. Lazarovitch, U. Shani, T. L. Thompson, and A. W. Warrick; 132 (6), 531-6 (2006).

Sharkey, L. J.

Evaluating Bioretention Hydrology and Nutrient Removal at Three Field Sites in North Carolina — W. F. Hunt, A. R. Jarrett, J. T. Smith, and L. J. Sharkey; 132 (6), 600-8 (2006).

Shivapur, A. V.

Closure to "Generalized Head-Discharge Equation for Flow over Sharp-Crested Inclined Inverted V-Notch Weir" by M. N. Shesha Prakash and A. V. Shivapur — M. N. Shesha Prakash and A. V. Shivapur; 132 (1), 81-2 (2006).

Singh, Sushil K.

Simplified Kernel Method for Flow to Large Diameter Wells — Sushil K. Singh; 132 (1), 77-9 (2006).

Diagnostic Curve for Estimating Soil Dispersivity and Instantaneously Injected Mass — Sushil K. Singh; 132 (3), 281-3 (2006).

Optimal Instantaneous Unit Hydrograph from Multistorm Data — Sushil K. Singh; 132 (3), 298-302 (2006).

Flow Depletion of Semipervious Streams Due to Unsteady Pumping Discharge — Sushil K. Singh; 132 (4), 406-9 (2006).

Closure to "Ramp Kernels for Aquifer Responses to Arbitrary Stream Stage" by Sushil K. Singh — Sushil K. Singh; 132 (4), 430-1 (2006).

Flow Depletion Induced by Pumping Well from Finite Length of Stream — Sushil K. Singh; 132 (5), 508-12 (2006).

Singh, Vijay P.

Hydrologic Modeling Inventory: Cooperative Research Effort — Vijay P. Singh, Donald K. Frevert, Jeffrey D. Rieker, Verne Leverson, Susan Meyer, and Steffen Meyer; 132 (2), 98-103 (2006).

Smith, J. T.

Effect of Controlled Drainage and Vegetative Buffers on Drainage Water Quality from Wastewater Irrigated Fields — Z. Jia, R. O. Evans, and J. T. Smith; 132 (2), 159-70 (2006).

Evaluating Bioretention Hydrology and Nutrient Removal at Three Field Sites in North Carolina — W. F. Hunt, A. R. Jarrett, J. T. Smith, and L. J. Sharkey; 132 (6), 600-8 (2006).

Smout, Ian K.

Performance-Based Optimization of Land and Water Resources within Irrigation Schemes. I: Method — Sunil D. Gorantiwar, Ian K. Smout, and K. Vairavamoorthy; 132 (4), 332-40 (2006).

Performance-Based Optimization of Land and Water Resources within Irrigation Schemes. II: Application — Ian K. Smout, Sunil D. Gorantiwar, and K. Vairavamoorthy; 132 (4), 341-8 (2006).

Productivity and Equity of Different Irrigation Schedules under Limited Water Supply — I. K. Smout and S. D. Gorantiwar; 132 (4), 349-58 (2006).

Snyder, Richard L.

Estimation of Evapotranspiration of Different-Sized Navel-Orange Tree Orchards Using Energy Balance — Simona Consoli, Neil O'Connell, and Richard Snyder; 132 (1), 2-8 (2006).

Measurement of Light Interception by Navel Orange Orchard Canopies: Case Study of Lindsay, California — Simona Consoli, Neil O'Connell, and Richard Snyder; 132 (1), 9-20 (2006).

Estimating Evaporation from Bare Soil Using Soil Moisture Data — Francesca Ventura, Richard L. Snyder, and Khaled M. Bali; 132 (2), 153-8 (2006).

Sridhar, V.

Assessment of Soil Moisture Dynamics of the Nebraska Sandhills Using Long-Term Measurements and a Hydrology Model — V. Sridhar, K. G. Hubbard, and D. A. Wedin; 132 (5), 463-73 (2006).

Srivastava, Rajesh

Discussion of "Determination of Length of a Horizontal Drain in Homogeneous Earth Dams" by Bhagu R. Chahar — Rajesh Srivastava; 132 (1), 88-9 (2006).

Discussion of "Exact Solutions for Sequent Depths Problem" by Prabhata K. Swamee and Pushpa N. Rathie — Rajesh Srivastava; 132 (3), 304 (2006).

Discussion of "Ramp Kernels for Aquifer Responses to Arbitrary Stream Stage" by Sushil K. Singh — Rajesh Srivastava; 132 (4), 429-30 (2006).

Discussion of "Uniform and Critical Flow Computations" by Ramappa G. Patil, J. S. R. Murthy, and L. K. Ghosh — Rajesh Srivastava; 132 (6), 633-4 (2006).

Stoecker, Arthur L.

Economic Analysis of an Irrigation System for Liquid Manure Application — Tihomir Ancev and Arthur L. Stoecker; 132 (4), 399-405 (2006).

Strand, R. J.

Salt River Project Canal Automation Pilot Project: Simulation Tests — E. Bautista, A. J. Clemmens, and R. J. Strand; 132 (2), 143-52 (2006).

Sutherland, P. Lorenz

Calibration of Electromagnetic Induction for Regional Assessment of Soil Water Salinity in an Irrigated Valley — James M. Wittler, Grant E. Cardon, Timothy K. Gates, Curtis A. Cooper, and P. Lorenz Sutherland; 132 (5), 436-44 (2006).

Sveinsson, O. G.

Stochastic Streamflow Simulation Using *SAMS-2003* — J. D. Salas, O. G. Sveinsson, W. L. Lane, and D. K. Frevert; 132 (2), 112-22 (2006).

Swamee, Prabhata K.

Closure to "Exact Solutions for Sequent Depths Problem" by Prabhata K. Swamee and Pushpa N. Rathie — Prabhata K. Swamee and Pushpa N. Rathie; 132 (3), 305-6 (2006).

Tan, Soon-Keat

Performances of Hydraulics and Bedload Sediment Flushing in Rigid Channel Using Surge Flows — Guoliang Yu and Soon-Keat Tan; 132 (2), 171-9 (2006).

Errors in the Bed Shear Stress as Estimated from Vertical Velocity Profile — Guoliang Yu and Soon-Keat Tan; 132 (5), 490-7 (2006).

Tarjuelo Martín-Benito, José María

Set Sprinkler Irrigation and Its Cost — José Nicolás Ortiz Romero, Jesús Montero Martínez, Roberto Simón Martínez, and José María Tarjuelo Martín-Benito; 132 (5), 445-52 (2006).

Taylan, E. Dilek

Estimating Evaporation Using ANFIS — Özlem Terzi, M. Erol Keskin, and E. Dilek Taylan; 132 (5), 503-7 (2006).

Tchiftchibachian, A.

Investigation of the Influence of Sprinkler Fins and Dissolved Air on Jet Flow — M. Pascal, N. Kadem, and A. Tchiftchibachian; 132 (1), 41-6 (2006).

Terzi, Özlem

Estimating Evaporation Using ANFIS — Özlem Terzi, M. Erol Keskin, and E. Dilek Taylan; 132 (5), 503-7 (2006).

Terzidis, George

Discussion of "Exact Solutions for Sequent Depths Problem" by Prabhata K. Swamee and Pushpa N. Rathie — G. Terzidis; 132 (3), 305 (2006).

Discussion of "End Depth–Discharge Relation at Free Overfall of Trapezoidal Channels" by A. S. Ramamurthy, Chao Zhai, and Junying Qu — E. Anastasiadou-Partheniou, E. Hatzigiannakis, and G. Terzidis; 132 (3), 306-7 (2006).

Discussion of "Uniform and Critical Flow Computations" by Ramappa G. Patil, J. S. R. Murthy, and L. K. GhoshGeorge Terzidis; 132 (6), 635-6 (2006).

Thompson, David B.

Instantaneous Unit Hydrograph Evaluation for Rainfall-Runoff Modeling of Small Watersheds in North and South Central Texas — Theodore G. Cleveland, Xin He, William H. Asquith, Xing Fang, and David B. Thompson; 132 (5), 479-85 (2006).

Thompson, T. L.

Soil Hydraulic Properties Affecting Discharge Uniformity of Gravity-Fed Subsurface Drip Irrigation Systems — N. Lazarovitch, U. Shani, T. L. Thompson, and A. W. Warrick; 132 (6), 531-6 (2006).

Todisco, Francesca

Optimal Reservoir Operations for Irrigation Using a Three Spatial Scales Approach — Francesco Mannocchi and Francesca Todisco; 132 (2), 130-42 (2006).

Umamahesh, N. V.

Optimal Irrigation Planning under Water Scarcity — A. Srinivasa Prasad, N. V. Umamahesh, and G. K. Viswanath; 132 (3), 228-37 (2006).

Vairavamoorthy, K.

Performance-Based Optimization of Land and Water Resources within Irrigation Schemes. I: Method — Sunil D. Gorantiwar, Ian K. Smout,

and K. Vairavamoorthy; 132 (4), 332-40 (2006).
Performance-Based Optimization of Land and Water Resources within Irrigation Schemes. II: Application — Ian K. Smout, Sunil D. Gorantiwar, and K. Vairavamoorthy; 132 (4), 341-8 (2006).

Ventura, Francesca

Estimating Evaporation from Bare Soil Using Soil Moisture Data — Francesca Ventura, Richard L. Snyder, and Khaled M. Bali; 132 (2), 153-8 (2006).

Viswanath, G. K.

Optimal Irrigation Planning under Water Scarcity — A. Srinivasa Prasad, N. V. Umamahesh, and G. K. Viswanath; 132 (3), 228-37 (2006).

Vo, Diep

VOF Model for Simulation of a Free Overfall in Trapezoidal Channels — A. S. Ramamurthy, Junying Qu, and Diep Vo; 132 (4), 425-8 (2006).
Nonlinear PLS Method for Side Weir Flows — A. S. Ramamurthy, Junying Qu, and Diep Vo; 132 (5), 486-9 (2006).

Wahlin, Brian T.

Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Theory — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 198-207 (2006).
Automatic Downstream Water-Level Feedback Control of Branching Canal Networks: Simulation Results — Brian T. Wahlin and Albert J. Clemmens; 132 (3), 208-19 (2006).

Wang, Qing-Gai

Method for Measurement of Canopy Interception under Sprinkler Irrigation — Qing-Gai Wang, Yaohu Kang, Hai-Jun Liu, and Shi-Ping Liu; 132 (2), 185-7 (2006).

Warrick, A. W.

Soil Hydraulic Properties Affecting Discharge Uniformity of Gravity-Fed Subsurface Drip Irrigation Systems — N. Lazarovitch, U. Shani, T. L. Thompson, and A. W. Warrick; 132 (6), 531-6 (2006).
Modified Kostiakov Infiltration Function: Accounting for Initial and Boundary Conditions — A. Furman, A. W. Warrick, D. Zerihun, and C. A. Sanchez; 132 (6), 587-96 (2006).

Wedin, D. A.

Assessment of Soil Moisture Dynamics of the Nebraska Sandhills Using Long-Term Measurements and a Hydrology Model — V. Sridhar, K. G. Hubbard, and D. A. Wedin; 132 (5), 463-73 (2006).

Wittler, James M.

Calibration of Electromagnetic Induction for Regional Assessment of Soil Water Salinity in an Irrigated Valley — James M. Wittler, Grant E. Cardon, Timothy K. Gates, Curtis A. Cooper, and P. Lorenz Sutherland; 132 (5), 436-44 (2006).

Wöhling, Th.

Efficient Solution of the Coupled One-Dimensional Surface—Two-Dimensional Subsurface Flow during Furrow Irrigation Advance — Th. Wöhling, A. Fröhner, G. H. Schmitz, and R. Liedl; 132 (4), 380-8 (2006).

Wong, Tommy S. W.

Discussion of "Uniform and Critical Flow Computations" by Ramappa G. Patil, J. S. R. Murthy, and L. K. Ghosh — Tommy S. W. Wong; 132 (6), 632 (2006).

Wongwises, Somchai

Flow Patterns and Energy Dissipation over Various Stepped Chutes — Chaiyuth Chinnarasri and Somchai Wongwises; 132 (1), 70-6 (2006).

Yıldırım, Gürol

Closure to "Comparative Analysis of Hydraulic Calculation Methods in Design of Microirrigation Laterals" by Gürol Yildirim and Necati Ağiralioğlu — Gürol Yıldırım and Necati Ağiralioğlu; 132 (1), 85-8 (2006).
Discussion of "Experimental Analysis of Local Pressure Losses for Microirrigation Laterals" by Giuseppe Provenzano and Domenico Pumo — Gürol Yıldırım; 132 (2), 189-93 (2006).
Hydraulic Analysis and Direct Design of Multiple Outlets Pipelines Laid on Flat and Sloping Lands — Gürol Yıldırım; 132 (6), 537-52 (2006).

Yu, Guoliang

Performances of Hydraulics and Bedload Sediment Flushing in Rigid Channel Using Surge Flows — Guoliang Yu and Soon-Keat Tan; 132 (2), 171-9 (2006).
Errors in the Bed Shear Stress as Estimated from Vertical Velocity Profile — Guoliang Yu and Soon-Keat Tan; 132 (5), 490-7 (2006).

Zagona, Edith A.

Watershed and River Systems Management Program: Overview of Capabilities — Donald Frevert, Terrance Fulp, Edith Zagona, George Leavesley, and Harry Lins; 132 (2), 92-7 (2006).
Modeling Uncertainty in an Object-Oriented Reservoir Operations Model — John C. Carron, Edith A. Zagona, and Terrance J. Fulp; 132 (2), 104-11 (2006).

Zerihun, D.

Modified Kostiakov Infiltration Function: Accounting for Initial and Boundary Conditions — A. Furman, A. W. Warrick, D. Zerihun, and C. A. Sanchez; 132 (6), 587-96 (2006).

Zhai, Chao

Closure to "End Depth–Discharge Relation at Free Overfall of Trapezoidal Channels" by A. S. Ramamurthy, Chao Zhai, and Junying Qu — A. S. Ramamurthy, Chao Zhai, and Junying Qu; 132 (3), 307 (2006).
